U. S. DEPARTMENT OF AGRICULTURE,  
BUREAU OF ANIMAL INDUSTRY,  
*Washington, D. C., January 1, 1928.*

TO BUREAU EMPLOYEES:

The following information respecting State requirements for livestock entering the various States was obtained by the bureau from accredited officials of each State. Persons desiring fuller information on the subject of State laws and regulations should communicate directly with said officials.

This issue supersedes the one issued in February, 1926.

J. R. MOHLER,  
*Chief of Bureau.*

# STATE SANITARY REQUIREMENTS GOVERNING ADMISSION OF LIVESTOCK

---

## ALABAMA

*Horses, mules, and asses.*—Health certificate and, if exposed to glanders, mallein-test chart must accompany same. Designate each animal as mare, gelding, stallion, jack, jennet, horse mule, or mare mule.

*Cattle.*—Health certificate, including tuberculin test, for all breeding and dairy cattle and for feeding and grazing cattle over 2 years of age. Steers for feeding or grazing under 2 years of age require affidavit of owner that he will keep them separate from other cattle during feeding period. Breeding and dairy cattle are subject to retest within 60 to 90 days after arrival.

No ticky cattle, horses, or mules shall be brought into Alabama. Cattle from the area quarantined for splenic fever shall be accompanied by certificate of inspection or dipping.

Cattle from counties where one or more herds are quarantined for tick infestation or exposure must have Federal certificate to come into Alabama.

Cattle from tick-infested, inactive areas or counties can not be moved through dipping stations or otherwise into or through Alabama.

*Dogs.*—Health certificate, stating no exposure to disease.

*Hogs.*—To ship or bring swine into Alabama for any purpose other than for immediate slaughter, the owner or shipper shall make an affidavit and send it to the State veterinarian of Alabama and attach a copy of it to the shipping bill. The affidavit shall contain the following statements: That said swine (giving breed, age, sex, color, and other markings) have been inoculated with a standard dose of Federal-standard, anti-hog-cholera serum within 10 days of the time of shipment into Alabama, or have been inoculated with a standard dose of Federal-standard, anti-hog-cholera serum and virus at least 21 days before shipment into Alabama.

The swine and crate or car shall be disinfected with a standard Federal disinfectant at the time of loading or before they arrive in Alabama.

*Sheep.*—Health certificate.

*Poultry.*—Affidavit by owner, or health certificate by a qualified veterinarian, that the poultry has not been exposed to or infected with any contagious or infectious disease.

*Who may inspect.*—Any legally qualified veterinarian who is indorsed by his State veterinarian or by the United States Bureau of Animal Industry.

*Official.*—State veterinarian, Auburn, Ala., to whom copies of all certificates must be sent.

## ALASKA

*Horses, mules, and asses.*—Inspection and health certificate showing animals to be free from contagious, infectious, or communicable disease.

*Cattle.*—Inspection for all cattle and health certificate showing freedom from contagious, infectious, or communicable disease. Tuberculin test for feeding, breeding, and dairy cattle.

*Sheep.*—Inspection and health certificate.

*Swine.*—Inspection and health certificate and serum treatment for hog cholera within two weeks before shipping.

*Who may inspect.*—Inspectors of the United States Bureau of Animal Industry and legally qualified veterinarians of the State of origin authorized by the State and approved by the bureau.

*Official.*—Secretary for the Territory of Alaska, Juneau.

## ARIZONA

*Horses.*—All horses, mules, and asses imported into the State of Arizona, shall be accompanied by a health certificate made within 20 days of such animals' entering the State, showing they were found free from contagious or infectious diseases, or exposure thereto. Stallions and jacks intended for public service within the State shall also be accompanied by health certificates showing them to be free from any hereditary, infectious, or transmissible disease or serious defect in conformation. The original of this certificate must accompany shipment and one copy must be mailed to the State veterinarian of Arizona at least 5 days before shipment is made into the State.

*Cattle.*—Health certificate, including tuberculin test within past 30 days (intradermic accepted) by an authorized veterinarian, for all dairy and breeding

cattle. Breeding and dairy cattle shall be held in quarantine for 60 days after date of arrival for retest, the retest to be made at the owner's expense.

All dairy cattle coming into Arizona from any State must be accompanied by certificate from authorized State or Federal inspector stating that the cattle originated in herds showing not more than 3 per cent tuberculous infection.

*Swine.*—All swine imported into the State of Arizona must be accompanied by a certificate of health showing that they are free from infectious, contagious, or communicable disease, or exposure thereto, certifying that they have originated in a locality free from disease for a period of 90 days prior to shipment; otherwise certificate must show that they have been immunized by double treatment for hog cholera at point of origin and not loaded for period of 21 days after such immunization. Hogs for immediate slaughter may enter the State if accompanied by a health certificate of an authorized veterinarian. The original of this certificate must accompany shipment and one copy be mailed to the State veterinarian of Arizona.

*Sheep.*—Health certificate showing them to be free from contagious, infectious, and communicable diseases and must be dipped within 10 days of shipment or within 10 days after arrival at destination under supervision of a Federal inspector.

*Goats.*—Health certificate by an authorized veterinarian, including laboratory test for Malta fever by recognized laboratory.

*Dogs.*—All dogs imported into the State of Arizona must be accompanied by a health certificate, said certificate to include a statement to the effect that no rabies has existed for a period of 6 months at point of origin.

*Who may inspect.*—Federal veterinarians, State veterinarians, assistant State veterinarians, and other veterinarians authorized to make tests and inspections for interstate shipments by the livestock authorities of the State in which they reside.

*Certificates.*—All health certificates must be made within 30 days of date of animals' entering the State. They must be in quadruplicate, the original sent to the chief of the bureau at Washington, duplicate attached to waybill, triplicate sent to State veterinarian of State of origin of shipment, and quadruplicate sent to State veterinarian, Phoenix.

*Exceptions.*—At the discretion of the State veterinarian, animals may be permitted to enter the State

subject to quarantine and inspection at destination by the State veterinarian at the expense of the owner.

*Permit necessary.*—No animals shall be shipped or moved into the State without a permit from the State veterinarian in addition to the proper health certificates as outlined above. In writing or wiring for permit for animals to enter the State give consignor, consignee, point of origin and destination of shipment, what health certificate held and by whom made.

*Hog-cholera virus.*—All serum manufacturers and dealers are prohibited from shipping any virulent blood or hog-cholera virus into the State of Arizona without the permission of the State veterinarian.

*Official.*—State veterinarian, Phoenix.

## ARKANSAS

*Horses, mules, and asses.*—Horses, mules, and asses from inactive tick quarantined area shall be dipped in a standard arsenical solution under the supervision of the livestock sanitary official of the State of origin or an inspector of the Federal Bureau of Animal Industry and must be free of ticks at the time of dipping. No other requirements are necessary.

*Cattle.*—Dairy and breeding cattle brought into the State shall have passed a negative tuberculin test applied by an accredited, approved, Federal or State veterinarian by the intradermic or subcutaneous method. At the discretion of the State veterinarian such animals may be retested at the owner's expense by a veterinarian approved by the State veterinarian.

All breeding cattle, including calves 6 months old or more, shall pass a negative blood test for contagious abortion (agglutination or complement fixation), made by a Federal, State, or competent commercial laboratory, not more than three weeks prior to shipment into the State.

Each animal shall be ear-tagged or otherwise permanently marked for identification, and the health certificate must show the date of the test and the name of the laboratory making the test. The original report from the testing laboratory must be attached to the copy of the health certificate sent to the State veterinarian by the veterinarian who issues the health certificate.

Cattle may pass through the State as southern cattle in conformity with Federal regulations: *Provided*, That such cattle have been dipped under the supervision of an authorized inspector of the livestock sani-

tary official of the State of origin or of the Federal Bureau of Animal Industry, and found apparently free of ticks, shipment may be made within 14 days after dipping. If shipment is not made on the day of dipping, cattle must be apparently free of ticks upon a second inspection at the time of shipment.

*Hogs.*—All hogs except for immediate slaughter shall be accompanied by a health certificate showing the administration of serum and virus by a Federal, State, approved, or accredited veterinarian.

*Sheep.*—Sheep entering the State shall be healthy and must have a Federal certificate from quarantined areas.

*Who may inspect.*—Veterinary inspectors of the Bureau of Animal Industry or official veterinarians of the State of origin.

*Official.*—State veterinarian, Old State House, Little Rock.

## CALIFORNIA

*Horses, mules, and asses.*—Health certificate. In lieu of health certificate horses, mules, and asses may be brought into California when accompanied by signed statement of State veterinarian or other livestock sanitary authority stating that each animal in the shipment is free from and has not recently been exposed to any communicable disease.

*Cattle.*—Health certificate including tuberculin test for dairy and breeding cattle. All cattle shipments to be made in accordance with Federal interstate regulations.

*Note.*—Purebred cattle subject to retest within 90 days after arrival. Reactors must be slaughtered or returned to place of origin. Cattle shipments destined to modified accredited or tuberculosis-eradication areas to conform to special Federal-State regulations governing the eradication of tuberculosis. Hence it is advisable for shippers to make inquiry if in doubt concerning such movements.

Transportation companies before accepting cattle for shipment to California should ascertain if any special regulations are in effect governing the shipment of cattle from States where cattle scab is known to exist.

*Sheep and goats.*—In accordance with Federal regulations. Persons contemplating such shipments must comply with the following:

Any person or persons desiring to ship buck sheep into the State of California shall notify the department

of agriculture of the State of California by registered mail before said importation shall be made; said notice shall give the names and addresses of consignor and consignee, the number of animals shipped, and the origin and destination of the shipment. If said bucks are not shipped in crates or in railroad cars which have been cleaned and disinfected prior to loading, or if they have been unloaded in corrals while en route to destination, they may be dipped one or more times by a duly authorized agent of the State department of agriculture.

Any person or persons desiring to transport sheep or goats into the State of California, except sheep or goats for immediate slaughter, shall notify the State department of agriculture by registered mail before said importation shall be made, which notice shall include the names and address of the consignor and consignee, the owner of said sheep or goats, the place of entrance into the State, and such description of the destination as will enable a duly authorized agent of the said department of agriculture to locate readily said sheep or goats upon their arrival.

*Hogs—From public stockyards in accordance with Federal regulations.*—Hog shipments originating in districts where cholera has existed within three months must be accompanied by a certificate from a licensed veterinarian stating that the entire number of hogs in the shipment is not affected with or exposed to cholera or other infectious disease.

*Exemptions.*—Animals accompanying emigrant outfits are exempt from all inspection requirements. Animals for theatrical and exhibition purposes are exempt from general inspection requirements, provided they do not remain in California.

*Who may inspect.*—Any qualified veterinarian who is a graduate of a duly recognized and accredited veterinary college.

*Official.*—Chief, division of animal industry, State department of agriculture, Sacramento.

## COLORADO

*Horses, mules, and asses.*—Must be accompanied by bill of health showing them to be free from all contagious or infectious diseases, and any stallion or jack for breeding purposes must be accompanied by a certificate that he is not a ridgeling and is not deformed or afflicted with any of the diseases or unsoundnesses known as roaring, ringbone, chorea (St. Vitus's dance),

crampiness, shivering, stringhalt, bone spavin, bog spavin, specific ophthalmia. (moon blindness), curb (when accompanied by curby conformation), or any form of venereal or other contagious disease; the bill of health and certificate to be issued by a licensed graduate veterinarian who is authorized by the sanitary authorities of the State of origin to inspect livestock for interstate shipment, or by a Federal veterinarian. *Except* that such shipments as are made to or through the Denver Union Stockyards, where Federal inspection is maintained, do not require a bill of health provided the waybills are endorsed "Subject to health inspection at Denver."

*Cattle.*—All bulls and pedigreed female cattle and any farm-raised, gentle, female cattle and any female cattle intended for dairy purposes must be accompanied by a bill of health and tuberculin-test chart showing freedom from tuberculosis. Either the intradermic or subcutaneous test will be accepted when made in full compliance with the Federal rules for making such tests. Cattle from Federal-State accredited herds and from areas officially declared to be modified accredited tuberculosis-free areas may be brought into Colorado if accompanied by a health certificate reciting that the cattle are from such herds or areas and giving the date of last test, which must not be more than 12 months previous to shipment. All other classes of cattle require health certificate.

*Swine.*—For purposes other than immediate slaughter must be accompanied by the affidavit of the owner or shipper that the animals have not been exposed to the infection of hog cholera, must be shipped in clean and disinfected cars, and not unloaded in public stockyards en route.

*Sheep.*—In compliance with the regulations of the United States Department of Agriculture.

*Who may inspect.*—Inspections and tests to be made in all cases by a licensed graduate veterinarian authorized by the sanitary authorities of the State of origin or by a Federal veterinarian.

*Official.*—State veterinary surgeon, Denver.

## CONNECTICUT

*Horses, mules, and asses.*—Permit, health certificate, or ophthalmic mallein test.

*Cattle.*—Permit, health certificate, and tuberculin-test chart for all cattle for dairy and breeding, subject to retest on arrival, at the expense of the owner.

Cattle will not be approved for addition to herds under State and Federal supervision unless certified as from herds under State and Federal supervision. Permit for all cattle for slaughter subject to ear-tag identification before shipment and veterinary inspection at time of slaughter.

*Hogs.*—Permit and health certificate.

*Sheep.*—None.

*Poultry.*—For slaughter, permit, and veterinary inspection on arrival at expense of consignee. No restrictions on poultry for breeding and utility.

*Who may inspect.*—Commissioner or his agent.

*Official.*—Commissioner on domestic animals, State Capitol, Hartford.

## DELAWARE

*Horses, mules, and asses.*—Health certificate by a Federal or State veterinarian or an officially certified veterinarian of State of origin. Originals of certificate shall be attached to waybill and duplicate sent so as to reach office of State board of agriculture before animals arrive at destination. If brought in by other than a common carrier the State board of agriculture must be notified before animals enter the State. Originals of certificate shall be in the possession of the person bringing the animals into the State.

In lieu of health certificate, permit may be obtained from the State board of agriculture to bring apparently healthy horses, mules, or asses into the State subject to quarantine at destination at owner's expense until the animals shall have been examined and tested by an approved veterinarian and released from quarantine by notice from the board or an agent thereof.

These requirements do not apply to horses, mules, and asses coming into the State temporarily engaged in interstate traffic.

*Cattle.*—Cattle for dairy or breeding purposes must be tested with tuberculin by a qualified veterinarian and accompanied by a tuberculin-test chart, showing animals to be free from tuberculosis.

Dairy and breeding cattle originating in the State of Illinois or consigned from that State, including the Chicago stockyards, destined to Delaware points, will be held in quarantine at destination at the owner's expense and retested with tuberculin within 60 days of date of arrival.

Dairy and breeding cattle from accredited herds or accredited areas in the State of Illinois will be accepted

when accompanied by a properly executed and officially approved tuberculin-test chart.

Dairy and breeding cattle and calves originating in any public stockyard or a point designated as a public-sale stable or sale yard, consigned to Delaware points, will be quarantined at destination at the owner's expense and held subject to an approved retest with tuberculin within 60 days, unless special written permission has been obtained in advance for shipment from any place enumerated in this paragraph.

*Hogs.*—Except for slaughter, must be accompanied by a health certificate.

*Sheep.*—None.

*Who may inspect.*—Federal or State inspector or veterinarian, whose certificate must be approved by State board of agriculture.

*Official.*—Secretary, State board of agriculture, Dover.

## DISTRICT OF COLUMBIA

*Horses, mules, and asses.*—None.

*Cattle.*—Permit from Chief of the Bureau of Animal Industry or health officer of the District of Columbia and, except for cattle for immediate slaughter, certificate of tuberculin test by a veterinary inspector of the Bureau of Animal Industry or an official veterinarian of the health department of the District of Columbia or of the State from which the animal is brought. Said certificate must show the place and the date of test and be issued within 30 days of date of entry; also temperature chart, description of the animal or animals, age, markings, and tag numbers, if tagged.

Cattle for immediate slaughter may enter the District of Columbia without the tuberculin test, but must be accompanied by a permit as indicated above and tagged by an official of the Bureau of Animal Industry or of the District of Columbia before entry, except that cattle under 6 months old, castrated cattle, and cattle shipped in cars consigned to an establishment having United States meat inspection may enter the District of Columbia for immediate slaughter without permit or tagging.

*Hogs.*—None.

*Sheep.*—None.

*Officials.*—Chief of the Bureau of Animal Industry, Washington; health officer, Washington.

## FLORIDA

*Horses, mules, and asses.*—Horses, mules, and asses from areas quarantined on account of splenetic or Texas fever must be accompanied by a bureau certificate of inspection or dipping.

*Cattle.*—Cattle from areas quarantined on account of splenetic or Texas fever must be accompanied by a bureau certificate of inspection or dipping.

Except as hereinafter provided, all cattle, including calves, shipped or driven into the State of Florida must be accompanied by an official health certificate, including a tuberculin-test record, accomplished within 60 days prior to the date of shipment.

Dairy and breeding cattle originating directly from accredited herds or from accredited areas of the several States or the District of Columbia will be accepted when accompanied by a properly executed and officially approved tuberculin-test record.

Dairy and breeding cattle, including calves, originating from nonaccredited herds or from nonaccredited areas of the several States or the District of Columbia and consigned to Florida points will be quarantined at destination at the owner's expense and held subject to an approved retest with tuberculin within 60 days, unless special and written permission has been obtained in advance for said particular shipment.

Strictly range cattle (not including bulls, heifers, and milk cows) admitted without tuberculin test on approval of State veterinarian.

Cattle for immediate slaughter admitted without tuberculin test if consigned to the following-named establishments, which are approved for the receipt of cattle for immediate slaughter: National Stock Yards, Farris Packing Co., Jones, Chambliss Co., Jacksonville, Fla.

*Hogs.*—Hogs, except for immediate slaughter, health certificate showing the animals to have been immunized with serum alone within 14 days or with serum and virus not less than 21 days prior to shipment. Hogs for immediate slaughter must be consigned to the establishments as approved for "Immediate slaughter" cattle.

*Sheep and goats.*—In accordance with Federal regulations.

*Who may inspect.*—Federal and State veterinarians and other veterinarians authorized by the proper official of the State of origin and approved by the United States Bureau of Animal Industry.

*Official.*—State veterinarian, Capitol Building, Tallahassee.

## GEORGIA

*Horses, mules, and asses.*—None except shipments or movements from tick-infested and quarantined areas, in which event all movements must be made under Federal inspection, supervision, and disinfection.

*Cattle.*—All cows, heifers, or bulls shipped or driven into the State must be accompanied by a health certificate, including tuberculin-test record, and on order of proper State official are subject to retest in from 30 to 60 days after arrival in the State. Any cattle not accompanied by a certificate as described above must be held at the State line until inspected and certified to by the State veterinarian of Georgia or his duly accredited deputy, the expense of the inspection to be paid by the owner of the cattle.

All breeding cattle, including calves 6 months old or more, shall pass a negative blood test for contagious abortion (agglutination or complement-fixation) made by a Federal, State, or competent commercial laboratory, not more than three weeks prior to shipment into the State of Georgia. Each animal shall be ear-tagged or otherwise permanently marked for identification, and the health certificate must show the date of the test and the name of the laboratory making the test. The original report from the testing laboratory must be attached to the copy of the health certificate sent to the State veterinarian of Georgia by the veterinarian who issues the health certificate.

Cattle moving in violation of these requirements will be quarantined and tested at the owner's expense, and any reactors will be tagged or branded for identification and quarantined upon the owner's premises. Violators of quarantine regulations will be prosecuted for a misdemeanor.

All cattle destined to or moving through Georgia must be free of ticks.

*Hogs.*—If shipped to recognized slaughtering centers for immediate slaughter, cars must be placarded "Exposed to hog cholera."

Hogs may not be reshipped from stockyards to farms unless they are first immunized.

Breeding hogs must be immunized by the serum-alone method not more than 14 days prior to shipment, or with serum and virus at least 21 days before shipment into Georgia, and hogs and crates or cars must be disinfected in a 2 per cent cresylic acid compound solution prior to shipment. Shipments must be accompanied by an affidavit by the owner, copy of

which shall be sent to the State veterinarian direct. The form of affidavit may be obtained by applying to the official named below.

*Sheep and goats.*—In accordance with Federal regulations.

*Who may inspect.*—Federal veterinarians, State veterinarian, or properly qualified deputies.

*Official.*—State veterinarian, Atlanta.

## HAWAII

Livestock from the mainland of the United States are subject to the regulations of the United States Department of Agriculture governing the humane handling and safe transport of livestock in interstate trade, and permit must be obtained for each shipment from the proper Federal official at the port of shipment.

Honolulu is made the only port of entry for animals subject to quarantine.

*Horses, mules, and asses.*—Health certificate stating that the animals are free from any disease contagious to horse stock.

Certificate showing that the animals have been mallein tested within two weeks, which certificate shall give a description of each animal (tail tag number or other marks of identification) and name and address of the consignee in Hawaii.

*Cattle.*—All cattle must be accompanied by a health certificate, including a chart showing that they have passed a satisfactory tuberculin test within 30 days from the date of shipment.

The tuberculin test is not required for cattle from an accredited herd accompanied by a certificate showing that they are from such herd.

All cattle of breeding age must be accompanied by a certificate showing that they have within 30 days passed a negative agglutination or complement-fixation test for contagious abortion.

*Swine.*—Swine for breeding purposes, except suckling pigs, shall be accompanied by (1) a certificate showing that they have been given the simultaneous treatment for hog cholera not later than 30 days before shipment; (2) an affidavit by the owner or importer showing that the certificate refers to the swine in question and that they have come from premises on which no hog cholera or swine plague has existed for a period of six months immediately preceding the date of shipment; and (3) a certificate issued by a veterinary officer of the United States Bureau of Animal Industry

showing that just prior to embarkation said swine had been dipped or sprayed in a 3 per cent cresol solution under his direction.

Swine for slaughter shall be accompanied by (1) a certificate showing that the animals have been subjected to the serum-alone treatment for hog cholera not later than 10 days previous to shipment; (2) an affidavit by the owner or importer showing that the certificate refers to the swine in question and that they have come from premises on which no hog cholera or swine plague has existed for a period of six months immediately preceding the date of shipment; and (3) a certificate issued by a veterinary officer of the United States Bureau of Animal Industry showing that just prior to embarkation the swine have been dipped or sprayed in a 3 per cent cresol solution under his direction.

*Sheep and goats.*—Sheep must be accompanied by a health certificate showing that the animals are free from sheep scab and have been shipped in accordance with the regulations of the United States Bureau of Animal Industry governing the transportation of livestock in interstate trade.

Goats must be accompanied by a health certificate stating that the animals have been given a careful veterinary examination and are apparently free from infectious and contagious disease.

*Dogs and cats.*—All dogs and cats coming from or through any country, State, or territory not officially declared free from rabies shall be kept in quarantine for a period of from 120 to 180 days.

Dogs and cats from countries, States, or Territories officially declared free from rabies may be admitted without quarantine if accompanied by a health certificate showing that the animals are apparently free from contagious disease.

*Who may inspect.*—Veterinary inspectors of the United States Bureau of Animal Industry and the State veterinarian of the State of origin, or duly qualified veterinarians whose certificates must be approved by either of the foregoing officials.

*Official.*—Territorial veterinarian, Honolulu.

## IDAHO

*Horses, mules, and asses.*—Mallein test, applied by a State-approved graduate or Federal veterinarian, not to exceed 30 days prior to shipment.

Horses for temporary exhibition or racing purposes, a clinical health certificate issued by a State-approved graduate or Federal veterinarian.

Mallein-test certificates covering stallions and jacks must show any malformations or defects.

*Cattle.*—Intradermic tuberculin test, applied by a State-approved or Federal veterinarian, not to exceed 30 days prior to shipment, on all dairy and breeding cattle. Right reserved to hold cattle in quarantine at the destination and retest after 60 days at State expense, no indemnity allowed.

Cattle from accredited herds admitted on certificate from authorized State or Federal official showing the accredited certificate number with copy of last test chart, if tested not to exceed six months prior to date of shipment, one copy of said health certificate to be furnished the Idaho bureau of animal industry, Boise, Idaho.

Cattle for *immediate* slaughter admitted on marked waybills to the following slaughtering points without certificate: Boise, Bonners Ferry, Lewiston, Moscow, Sandpoint, and Wallace.

Range cattle (not including bulls, heifers, and milk cows) admitted on clinical health certificate issued by a State-approved graduate or Federal veterinarian.

Cattle for temporary feeding and grazing purposes admitted on owner's affidavit to State bureau office in accordance with Federal regulations.

*Swine.*—Swine for feeding and breeding purposes from noninfected districts admitted on health certificates from authorized graduate State or Federal veterinarian, certifying that animals were loaded through clean and disinfected chutes and into clean and disinfected cars, or by express in crates.

Swine from infected districts must be immunized by simultaneous method by authorized graduate State or Federal veterinarian in accordance with bureau regulations, the animals dipped and not loaded earlier than 21 days after treatment. When immunized by serum alone, animals must be dipped and shipped not later than 15 days after receiving treatment.

Purebred swine are admitted when shipped in crates, on owner's affidavit or form furnished by the Idaho bureau of animal industry, Boise.

Serum and virus shipments into the State allowed only on permit from the State bureau, Boise.

(Forms of affidavits for purebred swine may be obtained from the official named below.)

*Dogs.*—All dogs entering the State of Idaho must be accompanied by official health certificate certifying that the animal has not been exposed to any infectious, contagious, or communicable disease, and that rabies has not existed in the district for the past six months.

All dogs entering the State of Idaho from districts where rabies exists or has existed within the past six months must be accompanied by official health certificate certifying that the animal has been immunized against rabies infection.

*Poultry.*—All hatching eggs, baby chicks, growing and breeding stock, transported or otherwise moved into the State of Idaho, must be accompanied by an official health certificate showing freedom from white diarrhea infection.

All hatching eggs, baby chicks, and growing stock shall have come from parent stock which has been found free from bacillary white diarrhea by the application of the agglutination test within 12 months immediately prior to the breeding season during which the stock being transported or moved was produced. The stock to be used for breeding purposes must have been tested by the agglutination method within the 12 months prior to importation and found free from bacillary white diarrhea.

*Official.*—Director of animal industry, Boise.

*Sheep and goats.*—At least two days' notice in writing from owner or shipper of intentions to enter the State, stating the time and place of entry and final destination. Health certificate issued at the time of shipment, by Federal or State inspector, for all sheep and goats for feeding and breeding purposes showing such sheep and goats to be free from symptoms of any contagious, infectious, or communicable disease and to have originated in areas where scabies has not existed for 12 months next preceding date offered for transportation.

Animals must be shipped in clean and disinfected cars in accordance with the Federal regulations governing interstate movements of livestock. Sheep driven into the State on foot from any other State shall be inspected and certified before they are driven 2 miles within the State boundary. A duplicate of the certificate must be mailed to the official named below.

All bucks coming into the State from quarantined territory shall be dipped twice, under supervision of the inspector of the United States Bureau of Animal Industry, inspector in charge of the board of sheep commissioners, or his agents. All bucks coming from

clean territory shall be dipped once and shipped in clean and disinfected cars, the dipping to be approved by the State board or its inspector in charge. Sheep infected with or exposed to scabies must be dipped in a lime-sulphur solution within 10 to 14 days prior to shipment under State or Federal supervision and may be loaded only in clean and disinfected cars.

Purebred sheep and goats may be brought in for exhibition purposes when accompanied by an affidavit of the owner.

(Forms of affidavits mentioned in these requirements may be obtained from the office named below.)

*Official.*—Board of sheep commissioners, Boise.

## ILLINOIS

*Horses.*—All horses, mules, and asses imported into the State of Illinois must be accompanied by a certificate of health, showing the animals to be free from contagious and infectious diseases, and including mallein test conducted within 60 days prior to date of shipment.

Horses and mules consigned to public stockyards, markets, or for immediate slaughter may be admitted without restriction.

*Cattle.*—1. All cattle except as provided in paragraphs 2 and 4 must be covered by certificate of health including the tuberculin test administered within 30 days prior to date of shipment or by a permit issued by the division of animal industry for their consignment in quarantine for feeding purposes only.

2. Bulls, cows, heifers, steers, or spayed heifers must be covered by affidavit certifying as to their classification.

3. Feeder cattle shipped into an accredited area or into a county operating under the accredited area plan can not be released from quarantine unless tested for tuberculosis not less than 60 days after arrival at destination.

4. All cattle for exhibition within the State of Illinois must be accompanied by a certificate of health, issued and indorsed by the authorities of the State from which the exhibited animal originated, that such animals are free from tuberculosis as shown by a tuberculin test made within 90 days from the date of exhibition, unless said animal comes from a Federal or a State accredited herd or accredited area. Owners must furnish all water pails for watering cattle, as, for sanitary reasons, all watering troughs will be removed.

*Tuberculin.*—All sales of bovine and avian tuberculin, within the State, must be reported to the division of animal industry.

*Hogs.*—1. Hogs shipped from public stockyards must be covered by a permit and shipped after immunization by either the single or double method administered by a representative of the United States Bureau of Animal Industry or the State department of agriculture and held under quarantine for 21 days after arrival, during which time weekly reports of their condition must be rendered to the State sanitary veterinary inspector, division of animal industry, Springfield.

2. Hogs for feeding or breeding purposes not originating in or coming through public stockyards will be admitted:

(a) Upon permit from the State sanitary veterinary inspector when accompanied by certificate of health issued by recognized State or Federal officials of State of origin. Copy of permit shall accompany the hogs; if shipment, it shall be attached to the waybill. Such hogs are to be immunized on arrival and held under quarantine for 21 days after immunization if by the double treatment. In case of immunization by the single treatment, quarantine is removed. Owners of such hogs shall make weekly reports as to their condition to the State sanitary veterinary inspector until quarantine is removed.

(b) When accompanied by certificate of recognized State or Federal officials of State of origin, which certificate shows that these hogs have been immunized by the simultaneous treatment more than 21 days prior to the date of shipment. Hogs, treated by the simultaneous treatment, shall be held for a period of 21 days after treatment before they are eligible to be admitted to the State.

3. All hogs for exhibition purposes must be accompanied by certificate of health issued by a licensed veterinarian. Such hogs must be accompanied by affidavit that they have been immunized by either the single or the double treatment. If the single method is used, it must have been administered within 30 days prior to the date of movement. If the double method is used it must have been administered more than 30 days prior to the date of movement.

4. Transportation companies, before accepting shipments of hogs into Illinois, shall require certificates of health to be executed in duplicate form. The original of such certificate shall be attached to the

waybill, and the veterinarian issuing such certificate of health shall immediately forward duplicate of such certificate to the State sanitary veterinary inspector, Springfield.

*Sheep.*—Health certificate, except for immediate slaughter, showing that the animals have been inspected and dipped under State or Federal supervision not more than 15 days prior to importation, unless climatic conditions prevent, and found free from all contagious, infectious, or communicable diseases.

*Dogs.*—Dogs brought into the State must be accompanied by a certificate of health issued by the livestock disease control official or his duly authorized representative of the State in which the shipment originated stating that the animal or animals are free from communicable disease, performing dogs kept under direct control during stay in the State exempted.

*Who may inspect.*—State veterinarians and their assistants and inspectors of the United States Bureau of Animal Industry.

*Official.*—Chief veterinarian; superintendent, division of animal industry, Springfield.

## INDIANA

*Horses, mules, and asses.*—None except that stallions and jacks are subject to requirements of the Indiana stallion-enrollment board.

*Cattle.*—Health certificate, including tuberculin test for all cattle intended for breeding or dairy purposes. This class of cattle, unless from accredited herds, must pass a negative tuberculin test within 60 days just prior to shipment. Such certificate if issued by other than a veterinary inspector of the United States Bureau of Animal Industry must bear the indorsement of the proper officials of the State of origin.

All bulls entering the State from public stockyards, unless intended for immediate slaughter, shall, prior to such movement, be subjected to a tuberculin test, such test to be applied by a qualified veterinarian and a record thereof shall be submitted to the office of the State veterinarian: *Provided*, That bulls not over 6 months of age intended to be castrated on arrival at destination may be admitted on the owner's affidavit, or that of his agent, submitted to the representative of the United States Bureau of Animal Industry at public stockyards, setting out that such castration will actually be accomplished.

Female and steer cattle may enter the State for feeding and grazing purposes subject to quarantine and Indiana regulations on arrival at destination: *Provided, however,* That the necessary forms covering such shipment have been executed by the consignee or his duly authorized agent and submitted to a representative of United States Bureau of Animal Industry at public yards for approval.

Such consignments of feeding cattle originating outside of public stockyards where Federal inspection is maintained must be covered by special permit from the State veterinarian.

All cattle intended for exhibit at the Indiana State Fair shall first be subjected to a tuberculin test, the same to be applied by a qualified veterinarian, and the owner or owners of such animal or animals shall be required, prior to the admittance of any cattle to such State fair, to present to the person or persons in charge of such exhibit a certificate of health showing the animal or animals to have passed such test within 90 days immediately preceding date of exhibit, except cattle from an accredited herd or from a herd having passed a negative test within the six months immediately preceding date of exhibit.

*Sheep.*—Health certificate showing that they have been dipped, if passing through public stockyards: *Provided,* That in the winter and such times as the dipping of sheep would be hazardous to their health, the sheep may be withdrawn on permit from the State veterinarian, which permit shall be issued on the written agreement of the owner that the sheep will remain in his possession. Such sheep to be dipped at the direction and at such time as the State veterinarian may direct and at the expense of the owner.

Sheep originating outside of public stockyards where Federal inspection is maintained must be accompanied by qualified and approved veterinarian's health certificate or certificate signed by a veterinarian regularly employed by the Bureau of Animal Industry, United States Department of Agriculture, stating that the sheep are free from scabies and all communicable or infectious disease, copy of such certificate to be mailed to the State veterinarian. If health certificate can not be obtained, such consignments of sheep must be so routed as to be dipped in transit under Federal supervision.

*Hogs.*—For breeding or exhibition purposes must be accompanied by a health certificate issued by a gradu-

ate licensed veterinarian, showing them to have been immunized by either the serum alone or the serum-simultaneous method. The original of such certificate shall be attached to the waybill covering the shipment, and a duplicate thereof shall be forwarded to the office of the State veterinarian.

If the serum-alone method is used the certificate must show such treatment to have been administered within the 10 days immediately preceding date of shipment, or that the serum-simultaneous treatment shall have been administered at least 30 days prior to date of shipment.

All hogs must be shown to be free from contagious or infectious disease and must not have been exposed thereto, and all crates in which shipments are made must have been thoroughly cleaned and disinfected.

Hogs intended for feeding may be admitted on permit obtained from the office of the State veterinarian, subjecting them to immunization and quarantine for 30 days on the premises of the owner.

Permits will be issued for the removal of healthy swine from public stockyards when the swine have been immunized and dipped under the supervision of a veterinary inspector of the Bureau of Animal Industry or of an authorized deputy State or county veterinarian before movement from such yards, and all quarantine regulations are complied with: *Provided*, That no permits will be issued to any person to administer serum or virus for treatment of such swine unless such serum and virus are made in compliance with the Indiana law and the person administering them is a licensed veterinarian.

*Who may inspect.*—Veterinary inspectors of the United States Bureau of Animal Industry or authorized State or deputy State veterinarians.

*Official.*—State veterinarian, 149 Statehouse, Indianapolis.

## IOWA

*Horses, mules, and asses.*—All horses, mules, and asses imported into the States must be accompanied by a certificate of health, showing a record of mallein test, and certifying that the animals described on the certificate have been inspected and found free from all other contagious or infectious diseases. Such inspection shall not have been made more than 30 days prior to the date of importation.

*Cattle.*—All cattle for breeding or dairy purposes brought into the State must be accompanied by an

official health certificate including a chart showing that animals have passed a satisfactory tuberculin test, embodying the following requirements:

Showing them to be apparently free from any contagious, infectious, or communicable disease.

Cattle from Federal-State accredited tuberculosis-free herds, or from areas officially declared by the chief of the Federal Bureau of Animal Industry as modified accredited areas must be accompanied by an official certificate signed by Federal or State authorities of the State of origin showing them to be from such herds.

NOTE.—A modified accredited area is one in which the percentage of aged cattle infected with tuberculosis does not exceed one-half of 1 per cent (0.5 per cent).

The intradermic tuberculin test will be accepted provided it has been applied by a regularly employed State or Federal veterinarian, an accredited veterinarian, or by an approved veterinarian when indorsed by the authorities of the State of origin, provided the observations are made at the seventy-second hour.

All tuberculin tests must be made within 30 days of date of shipment.

All certificates of health must show the number of cattle included in the test, the name of the owner, and the post-office address.

All cattle not identified by registration name and number shall be identified by a proper metal tag bearing a serial number, attached to the right ear.

All female cattle and bulls for feeding and grazing purposes shipped into the State of Iowa, when untested and not from a State and Federal accredited tuberculosis-free herd or an area officially declared by the chief of the United States Bureau of Animal Industry as modified accredited areas, may be brought into the State provided they are marked for identification by being branded skin deep with the letter "F" not less than 2 nor more than 3 inches high on the right jaw.

Each shipment shall be accompanied by an agreement, on the part of the owner, that the animals will be handled and maintained as a separate unit from breeding cattle (which means they shall be quarantined, watered, and fed apart from breeding cattle), and that they will not again be sold or moved without the permission of the department unless and until they shall have been tuberculin tested by a qualified veterinarian, and a record of such test shall have been

filed in the office of the Iowa department of agriculture, Des Moines, Iowa.

Agreements required for this purpose shall be obtained from the Iowa department of agriculture.

The chief of the division of animal industry is authorized to reject any shipment.

No cattle shall be imported or brought in or allowed to enter a modified accredited area or a county operating under the county area plan for the eradication of tuberculosis except in accordance with the foregoing requirements.

Cattle for immediate slaughter can be shipped, transported, or otherwise moved into the State to a place where bureau or State meat-inspection service is maintained or to a place designated by the State department of agriculture, division of animal industry.

Reactors brought in for immediate slaughter must be consigned to a slaughtering establishment having Federal inspection and must be transported thereto in accordance with the regulations of the Federal Bureau of Animal Industry.

Cattle sold out of the State under sale contract to pass a 60 or 90 day tuberculin test and failing to pass the same, before returned to the original owner it is necessary for the party wishing to return such animal or animals to furnish a tuberculin-test chart showing the reaction, giving the date of reaction, and proving to the satisfaction of the chief of the division of animal industry that such animals are reactors.

All cattle presented for exhibition or other purposes at the Iowa State Fair or any fair or exhibition held within the State shall be either from a tuberculosis-free accredited herd or from a herd that has passed one clean test, within one year, under the cooperative plan or the county area plan for the accrediting of herds. Cattle other than those above specified shall have passed a satisfactory tuberculin test and found to be free from tuberculosis not more than 90 days prior to the opening date of the exhibition at such fairs.

*Swine.*—All swine imported into the State except for immediate slaughter must be accompanied by a certificate of health, certifying that they have been immunized with a protective dose of anti-hog-cholera serum not more than 15 days prior to date of importation when the serum alone is used and not less than 30 days prior to date of importation when the simultaneous method is used.

In lieu of a veterinarian's certificate, hogs shipped in crates for breeding purposes will be accepted on the

owner's affidavit, made in triplicate, that hogs have been immunized as required above. One copy of said affidavit is to be attached to the waybill for the shipment, one copy to be sent to the chief of the division of animal industry, Des Moines, and a copy to the livestock sanitary office of the State from which the shipment originates.

Stock hogs from central markets or livestock exchange may be shipped into the State in compliance with the regulations of the Federal Bureau of Animal Industry. Shipments handled under this rule must be held intact and under quarantine on consignee's premises for a period of not less than 21 days from date of immunization.

Alls wine exhibited at State, county, or other fairs or exhibitions in the State must be accompanied by a certificate that they have been immunized with anti-hog-cholera serum and virus not less than 30 days, or when serum alone is used not more than 15 days, prior to the date of such fair or exhibition.

*Sheep.*—All sheep imported into the State, except for immediate slaughter, must be accompanied by a certificate that they have been inspected or dipped under Federal regulations nor more than 15 days prior to date of importation and found free from all contagious, infectious, or transmissible diseases.

Feeding sheep may be brought into the State without dipping under special permit issued by the chief of the division of animal industry, Iowa department of agriculture, provided that they do not come from an area, public stockyards, or a feeding station that is under State or Federal quarantine on account of scabies or any other communicable disease. Shipments of this kind are to be accompanied with a health certificate issued by an inspector of the Federal Bureau of Animal Industry or by an accredited veterinarian showing them to be healthy. A copy of health certificate is to accompany the shipment, a copy to be forwarded to the Iowa department of agriculture, division of animal industry. It is further provided that they will be handled and maintained as a separate unit from breeding sheep and that they will not again be sold or moved, unless permission is granted by the department, without being dipped in a lime-sulphur dip made in the proportions of 8 pounds of unslaked lime (or 11 pounds of commercial hydrate lime, not air-slacked lime) and 24 pounds of flowers of sulphur to 100 gallons of water, or a nicotine dip containing not less than five one-hundredths of 1 per cent of

nicotine, under the supervision of a qualified veterinarian.

A record of such dip shall have been filed in the office of the Iowa department of agriculture, Des Moines, Iowa, or if at the end of 30 days the sheep have not been dipped and are in a healthy condition and so certified to the department by a qualified veterinarian they may be released from quarantine.

*Exceptions.*—The shipment, into the State, of horses, cattle, sheep, or swine from districts under State or Federal quarantine on account of mange or scabies is strictly prohibited.

These requirements do not apply to livestock destined to a public market or livestock exchange in Iowa.

Railroad and transportation companies are forbidden to move any livestock into or within the State or through the State except in compliance with the provisions set forth in any of these regulations, or on a special permit from the chief of the division of animal industry, Des Moines.

*Who may inspect.*—Certificates and test charts must be issued by a Federal, State, or assistant State veterinarian duly registered by the Federal Bureau of Animal Industry, or by an accredited State veterinarian or other authority having charge of diseases of domestic animals in States or origin. Certificates must be made in quadruplicate, the original to be attached to the waybill and the three copies to be forwarded by the veterinarian issuing them to the proper sanitary authorities, as indicated on margin of the copies of health certificates.

*Official.*—Chief of the division of animal industry, Des Moines.

## KANSAS

*Horses, mules, and asses.*—Certificates of soundness must accompany stallions and jacks, together with affidavit that they are free from any contagious, infectious, or communicable disease. Other horses, mules, and asses admitted without inspection.

*Cattle.*—Tuberculin-test certificate for dairy and breeding cattle. Dairy cattle entering Kansas are subject to a 60-day retest. In case reactors are found they revert to original owner or are sold for immediate slaughter without appraisalment. Both intradermic and subcutaneous tests are official when administered by an accredited veterinarian. All other classes of cattle are admitted by complying with

Bureau of Animal Industry's requirements to move interstate.

*Cattle* shipped into Kansas to be used for dairy purposes by a nonresident owner must be held for a period of 60 days from date of shipment and then tested for tuberculosis by an accredited veterinarian under the direction of the livestock sanitary commissioner, at the owner's expense, before disposing of them at either private or public sale and then sold under a 90-day retest guaranty.

*Swine*.—Stock hogs will be admitted into Kansas for feeding purposes on a permit for the purpose issued by the State livestock sanitary commissioner.

Breeding hogs will be admitted into Kansas on an affidavit of the owner to the effect that said hogs are healthy and originate on noninfected premises. The original affidavit will be attached to shipping bill and a duplicate forwarded to the livestock sanitary commissioner, Topeka.

*Sheep*.—No restrictions.

*Who may inspect*.—Inspectors of the United States Bureau of Animal Industry; veterinarians and inspectors having commission from the State livestock sanitary commissioner.

*Official*.—State livestock sanitary commissioner, Topeka.

## KENTUCKY

*Horses, mules, and asses*.—Official health certificate.

*Cattle*.—All dairy and breeding cattle, including calves, coming into the State must be accompanied by an official health certificate, including record of tuberculin test showing them to be free from tuberculosis or other contagious, infectious, or communicable disease, the test being applied within 60 days prior to shipment. Subcutaneous tuberculin test will be accepted when applied by veterinarians recommended by the State and approved by Federal officials. Intradermic tuberculin test will be accepted when applied by a regularly employed State or Federal veterinarian or veterinarians accredited by State and Federal officials, provided the date of injection and hour of observation (seventy-second hour) are recorded.

All cattle coming into Kentucky are subjected to a tuberculin test at the discretion of the State veterinarian.

Range female cattle of the beef breeds for feeding or grazing purposes are admitted, except into accredited counties, when accompanied by an official health cer-

tificate issued by a State, Federal, or approved veterinarian of the State of origin, who shall certify that he has inspected the cattle and that they are of the range type and free from symptoms of disease, and an affidavit of the owner or his authorized agent stating that said animals will be used for feeding or grazing purposes only, and that they will be segregated from dairy and breeding cattle during the feeding or grazing period, and will not be removed from premises except by special permit from the State veterinarian, said cattle being under quarantine until permit is issued for their removal; said affidavit shall give the exact number and kind of cattle, the name of the person from whom purchased, the name and post-office address of the person to whom consigned, and destination of shipment. Copy of health certificate and affidavit must be sent to the State veterinarian.

Cattle for exhibition purposes admitted when accompanied by official health certificate, including record of tuberculin test showing said cattle to be free from tuberculosis, issued by a veterinarian as designated in first paragraph, not to exceed 60 days prior to entering the State.

Cattle admitted from officially accredited tuberculosis-free herds as long as accredited certificate is in force, from modified accredited areas as long as such area is so declared, from herds under supervision on a tuberculin test conducted not longer than six months previous to shipment, official health certificate and record of tuberculin test as required in first paragraph.

Cattle are admitted for immediate slaughter without inspection when consigned to a designated slaughtering place.

*Hogs.*—For stocking, feeding, or breeding purposes official health certificate by qualified veterinarian, showing immunization with serum alone not more than five days before date of importation or with serum and virus before importation, and that they are free from all communicable swine diseases or exposure thereto during preceding 60 days, and have been dipped or sprayed in a 2 per cent solution of cresol compound, or its equivalent, and loaded in clean and disinfected car or crate. Date and method of immunization must be shown on the certificate. Hogs from public stockyards to be simultaneously treated according to Federal regulations.

*Sheep.*—Health certificate for purebred sheep. Sheep intended for purposes other than immediate

slaughter must be accompanied by a certificate of health indicating that they are free from disease and have been subjected to an official dipping for scabies in a solution approved by the United States Bureau of Animal Industry within 10 days immediately preceding date of shipment, and must be loaded in clean and disinfected cars. The dipping requirements do not apply to purebred sheep. Supervising inspector shall furnish dipping certificate, giving name and strength of dip. Sheep from areas quarantined on account of scabies shall receive two dippings not less than 10 days nor more than 15 days apart and loaded in clean and disinfected cars. No sheep showing symptoms of necrobacillosis in any of its forms shall be allowed movement into the State.

*Who may inspect.*—State or Federal inspectors and veterinarians whose certificates are approved by the livestock sanitary officials of the State in which shipment originates.

A copy of all official health certificates, records of tuberculin tests, certificates of dipping, and certificates of immunization must be forwarded to the State veterinarian.

*Official.*—State veterinarian, Frankfort.

## LOUISIANA

*Horses, mules, and asses.*—Health certificate showing freedom from contagious and infectious diseases. Horses, mules, and asses originating in areas quarantined on account of southern, splenic, or Texas fever outside of Louisiana, shall not be transported, driven, or allowed to drift therefrom into the State of Louisiana unless dipped under official State or Federal supervision in a standard arsenical solution either at point of origin or in transit.

*Cattle.*—Dairy and breeding cattle shall be free from tuberculosis and must be tested before entering the State. Test must comply with requirements of the United States Bureau of Animal Industry, such tuberculin-test charts issued by qualified graduate veterinarians. The tuberculin-test chart shall include the reading and record of at least three pre-temperatures at intervals of not less than 2 hours and six post-temperatures beginning 8 hours after injection of the tuberculin and continued at intervals of 2 hours. The intradermic test is acceptable when made by bureau, State, or accredited veterinarian. The ophthalmic test alone is not acceptable.

Cattle from tuberculosis-free accredited herds or from herds under State and Federal supervision will be admitted when accompanied by certificate issued by livestock sanitary officials of the State of origin or by representatives of the United States Bureau of Animal Industry certifying that the cattle are from such herds and have been tested within 12 months prior to shipment.

Range cattle not including bulls, heifers, and milk cows may be admitted into the State on clinical health certificate issued by a State approved or Federal veterinarian.

(NOTE.—All cattle for breeding and dairy purposes shipped into this State must be moved in compliance with Federal Regulation No. 7, respecting tuberculin test by Federal and State approved veterinarian, such certificates executed in detail in conformity with requirements of said Federal regulation.)

*Hogs.*—Importation of purebred swine by express, in crates, permitted when accompanied by affidavit of owner, countersigned by State sanitary official, to the effect that the swine, to the best of his knowledge and belief, are not affected with hog cholera or other contagious swine disease, and that cholera has not existed on the premises from which the swine are being removed for a period of not less than three months; also that the swine have not been subjected to the serum and virus treatment within 30 days immediately prior to date of shipment; otherwise certificate by veterinarian must show that such swine have been immunized by the serum-alone method not more than 15 days prior to date of shipment. Railroad stockyards are considered infectious, and no hogs yarded in or loaded through them will be accepted in the State of Louisiana for any purpose other than immediate slaughter.

Hog-cholera virus or virulent blood shall not be shipped by serum manufacturers into the State except by written permission from the secretary and executive officer.

*Sheep.*—Health certificate from qualified graduate veterinarian prior to shipment showing freedom from infectious, contagious, or communicable diseases.

*Who may inspect.*—Federal veterinarians, State veterinarians, deputy or assistant State veterinarians, and other veterinarians, provided they are graduates of veterinary colleges recognized by the United States Department of Agriculture and their competency and reliability are certified to by authorities in charge of

livestock sanitary control work in the State where shipment originates.

Duplicates of all health certificates must be sent to secretary and executive officer in ample time to reach him before arrival of stock so represented in inspection certificates.

*Official.*—Secretary and executive officer, State livestock sanitary board, Baton Rouge.

## MAINE

*Horses, mules, and asses.*—Any person or persons bringing horses into the State must have a permit and shall notify the chief of the division of animal industry within 48 hours of their arrival; the chief of the division of animal industry shall at once cause the animals to be examined by a physical examination, or to be tested with mallein, or cause the blood test to be used at the expense of the owner; or the chief of the division of animal industry may accept a certificate of health showing satisfactory mallein test of physical examination made by an inspector of the United States Bureau of Animal Industry, or by a veterinarian whose certificate is approved by the State official having authority to approve it under the laws of the State from which the animal was shipped. If an animal is found to be glandered, no compensation shall be allowed.

No permit or examination will be required for horses used in circuses and to perform on the stage.

*Cattle.*—No meat stock (calves, cows, steers, oxen, or bulls) or stags of any age shall be allowed to enter this State from any other State or country, for either dairying purposes, breeding purposes, or for slaughter, except cattle in transit under the control of the Federal Government, without a permit duly authorized by the chief of the division of animal industry, which permit shall accompany the shipment.

All persons bringing animals into the State must conform to the regulations of the United States Department of Agriculture requiring that such animals be tuberculin tested within a reasonable time prior to shipment, such test being administered by an inspector of the United States Department of Agriculture or by a veterinarian authorized by said United States Department of Agriculture to test for interstate shipment, and a copy of the tuberculin-test chart of such test must also accompany the animal or animals so tested

whether brought into the State by steamship, railroad, truck, or any other conveyance, or driven on foot.

All cattle brought into the State, except cattle coming from fully accredited herds or herds under State and Federal supervision in which no reactors were found on last test, shall be held in quarantine and be subjected to a 60-day retest at the expense of the owner. This shall not apply to cattle brought into the State on test by an approved veterinarian that are intended for reshipment out of the State, but the State will not pay indemnity on such cattle provided they react while in the State, and all cattle in such consignments must be accounted for to the chief of the division of animal industry, and if any are sold to remain in the State they shall be retested at the expense of the owner. This ruling shall not, however, apply to calves under 1 year of age from a fully accredited herd, or to cattle designed for immediate slaughter, but the latter must be slaughtered within 10 days after being brought into the State under inspection that shall be acceptable to the commissioner of agriculture or his duly authorized agent in charge of the livestock sanitary work.

*Hogs.*—Consignments of swine brought into Maine from other States shall be accompanied by a permit together with certificate from a veterinarian who is approved for interstate work showing that the hogs are from a herd where no hog cholera has existed or one that has been immunized by the serum and virus treatment, such treatment to have been administered at least 25 days prior to shipment. This rule does not apply to hogs for immediate slaughter consigned to an abattoir where proper meat inspection is maintained.

Railroad shipping pens and public stockyards, including yards used for holding stock at slaughterhouses, are considered infected and hereby quarantined, and no hogs shall be shipped or moved from such places for feeding or breeding purposes.

Reshipment of hogs from such quarantine places for slaughter shall be accompanied by a permit from the chief of the division of animal industry, State department of agriculture, and transportation companies shall receive hogs for shipment only in compliance with this ruling.

*Sheep.*—None.

Transportation companies (express, railroad, or steamship) shall notify the chief of the division of animal industry of the arrival of livestock at their destination.

*Who may inspect.*—Qualified veterinarians authorized by the chief of the division of animal industry.

*Official.*—Chief, division of animal industry, department of agriculture, Augusta.

## MARYLAND

*Horses, mules, and asses.*—Health certificate.

*Cattle.*—Female cattle or bulls for dairy, breeding, feeding, or grazing purposes must be accompanied by a satisfactory certificate of health and tuberculin-test chart. Tag numbers or registration numbers must be given.

All cattle shall be subject to a retest from 60 to 90 days after their arrival, should there exist, in the opinion of the officials in charge of the control of animal diseases in the State, a reasonable doubt as to the correctness of the former test. Pending a retest such cattle shall be in strict quarantine.

No cattle for dairy, breeding, feeding, or pasturing purposes shall be brought into areas where tuberculosis eradication is being or has been conducted under the area plan except cattle from herds under Federal and State supervision, in this or some other State, and no cattle shall be sold or offered for sale within or be brought into the above-described areas unless proof in writing shall be furnished to the livestock sanitary service of the Maryland State board of agriculture that such cattle have come from herds under Federal and State supervision and have been tuberculin tested within 90 days prior to their being brought into such areas, except that cattle moved directly from accredited herds will be accepted if tuberculin tested within one year prior to their being brought into areas tested, or under test. Cattle from modified accredited areas must have been tested within six months prior to their entry into areas affected by this regulation, except that any shipments of cattle originating in the States of Virginia, Tennessee, and all those counties in West Virginia with the exception of Monongalia, Marion, and Preston Counties may be brought into the above-described areas and are not required to be from accredited herds, herds under supervision, or modified accredited areas, but must be accompanied by a health certificate and tuberculin-test chart issued by a veterinarian approved by the State of origin and the Federal Bureau of Animal Industry. The tuber-

culin test must be made immediately prior to shipment into Maryland.

No steers for feeding or grazing may be brought into the above-mentioned areas unless they have passed a tuberculin test satisfactory to this board's representatives or unless under a special permit issued by the livestock sanitary service of the Maryland State board of agriculture, Fidelity Building, Baltimore.

Steers, bulls, cows, or heifers for immediate slaughter may be shipped to regular slaughter centers but to no other places in the State without written permission from the livestock sanitary service.

Cattle originating in the State of New York shall not be transported or driven into Maryland unless accompanied by a certificate of health including a tuberculin test issued by an inspector employed solely by the United States Bureau of Animal Industry, a State veterinarian of the New York State bureau of animal industry, or a veterinarian accredited by the Federal Bureau of Animal Industry and the State of New York for making tests of accredited herds.

No cattle originating in any area under quarantine on account of southern, splenic, or Texas fever shall be transported or driven into the State, and transportation companies are notified not to accept shipments of such cattle when consigned to any point in this State.

On permit issued by the Maryland State board of agriculture, cows, bulls, and heifers for immediate slaughter (within five days of arrival) may be brought into this State or removed from public stockyards when affidavit has been made by the owner and forwarded to the livestock sanitary service of the State board of agriculture, stating that such animals are for immediate slaughter and will not be used for any other purpose. This statement must show where animals will be located until slaughtered. No cattle can be removed from public stockyards until released by the authorized inspector in charge.

*Hogs.*—All swine brought into the State for feeding, breeding, or show purposes must be accompanied by a certificate of health issued by a veterinarian whose competency and reliability are attested by the authorities charged with the control of the diseases of domestic animals in the State of export, stating that they are free from any infectious or communicable disease and that each animal has been treated with a proper dose of anti-hog-cholera serum

from a United States approved laboratory, within 30 days of the date of entry into the State.

Hogs that have received the serum-virus treatment must not be brought into the State for purposes other than immediate slaughter until a period of at least 30 days has elapsed since date of treatment. Such animals must be given an antiseptic bath and not again exposed to infection before being shipped.

*Sheep.*—None.

*Who may inspect.*—Officially certified inspectors in the State from which animals originate, agents of the livestock sanitary service of the Maryland State board of agriculture, and inspectors of the United States Bureau of Animal Industry.

*Officials.*—Livestock sanitary service of the State board of agriculture, 816 Fidelity Building, Baltimore.

## MASSACHUSETTS

*Horses, mules, and asses.*—Permit of the director of animal industry must accompany shipments from New York, New Jersey, Rhode Island, or Connecticut.

*Cattle.*—Permit of the director of animal industry and approved record of tuberculin test must accompany all cattle, of whatever age, unless consigned (a) to public stockyards or quarantine stations at Brighton or Somerville; (b) for immediate slaughter at premises under Federal supervision. Slaughter cattle shipped to other points in the State must be accompanied by permit of the director.

*Swine.*—Permit required unless for immediate slaughter.

*Sheep.*—None.

*Who may inspect.*—United States Bureau of Animal Industry inspectors or qualified veterinarians approved by State livestock officials.

*Official.*—Director of animal industry, Statehouse, Boston.

## MICHIGAN

*Horses, mules, and asses.*—Health certificate, including mallein test.

*Cattle.*—Health certificate for dairy cattle, including tuberculin test. Affidavit from owner or agent for all cattle intended for feeding or grazing purposes.

Imported dairy and breeding cattle not originating in herds demonstrated to be free from tuberculosis under Federal and State supervision will be held in

quarantine at destination, subject to retest in 60 days at owner's expense.

Cattle consigned to the following counties, except steers which can be properly isolated, or cattle intended for immediate slaughter, must be properly tuberculin tested:

Alger.	Crawford.	Isabella.	Marquette.	Presque Isle.
Allegan.	Delta.	Jackson.	Mason.	Roscommon.
Antrim.	Dickinson.	Kalkaska.	Menominee.	Saginaw.
Baraga.	Emmet.	Kent.	Missaukee.	Saint Clair.
Barry.	Gladwin.	Keweenaw.	Monroe.	Sanilac.
Benzie.	Gogebic.	Lapeer.	Newaygo.	Schoolcraft.
Berrien.	Grand Traverse.	Leelanau.	Oakland.	Tuscola.
Branch.	Gratiot.	Lenawee.	Oceana.	Van Buren.
Calhoun.	Houghton.	Luce.	Ontonagon.	Wexford.
Charlevoix.	Ingham.	Macomb.	Otsego.	
Cheboygan.	Iosco.	Manistee.	Ottawa.	

Cattle consigned to the following counties, except cattle for immediate slaughter, must be properly tuberculin tested:

Cass.	Eaton.	Kalamazoo.	Muskegon.	Shiawassee.
Clinton.	Hillsdale.	Livingston.	Saint Joseph.	Wayne.

All cattle consigned to the following counties must be tuberculin tested:

Genesee.	Iron.	Ogemaw.	Washtenaw.
----------	-------	---------	------------

*Hogs.*—Health certificate, including certificate from graduate veterinarian, to the effect that hogs have been immunized against hog cholera at least 21 days prior to date of importation, following the use of the simultaneous inoculation, or within a period of 30 days following the use of the serum-alone method.

*Sheep.*—Dip required March 31 to October 1, under State or Government supervision, except when permission has been obtained from the director of animal industry or the chief veterinarian. Dipping requirements shall not be construed to apply to sheep imported for feeding purposes between August 31 and May 1.

*Who may inspect.*—Veterinarians graduated from an accredited veterinary college and authorized by State and Federal officials.

Tuberculin tests of imported cattle must be conducted by accredited veterinarians.

*Officials.*—Chief veterinarian, Lansing; director of animal industry, Lansing.

## MINNESOTA

*Horses, mules, and asses.*—All horses, mules, and asses imported into Minnesota must be accompanied by a health certificate, including mallein test, certifying that animals have been examined and mallein tested within 30 days prior to date of shipment and found to be free from glanders and other dangerous, transmissible diseases.

In lieu of such health certificate and mallein-test chart a permit may be obtained from the office of the State livestock sanitary board to import any apparently healthy horses, mules, or asses, in quarantine and to remain in quarantine at destination until the animals shall have been examined and tested at the owner's expense by an approved veterinarian and released from quarantine by notice from the board.

*Cattle.*—1. All cattle (with exception of steers) imported or brought into Minnesota, under Federal inspection shall be accompanied by an official health certificate, including an approved tuberculin-test chart showing them to be apparently free from tuberculosis and symptoms of any other contagious, infectious, or communicable disease: *Provided, however,* That apparently healthy cattle of any class may be consigned without inspection or health certificate to the public stockyards at South St. Paul, and cattle for the purpose of immediate slaughter may be consigned to approved slaughterhouses where the Federal Government maintains inspection.

2. Cattle brought into Minnesota for dairy and breeding purposes (except when consigned to the public stockyards at South St. Paul), and all cattle, with the exception of steers shipped or transported from the public stockyards at South St. Paul to points in the counties of Minnesota that are officially designated as modified accredited areas, or counties that are in the process of accreditation and in which the percentage of tuberculosis—as the result of any complete test of all the cattle within the county—is less than 1 per cent, shall be quarantined at their destination and retested at the owner's expense not earlier than 60 or later than 120 days from date of the tuberculin test by which such shipment was made; and during the period of quarantine such animals can not be removed, and must be isolated from all other animals: *Provided, also,* That cattle originating from Federal-State accredited tuberculosis-free herds may be brought into

any point in Minnesota without the requirements of quarantine and retest.

3. Steers accompanied by an official health certificate showing them to be free, apparently, from any infectious, contagious, and communicable disease, may be imported or brought into Minnesota, or may be shipped or transported from the public stockyards at South St. Paul, to points in Minnesota for feeding purposes: *Provided, however,* That when such steers are consigned to counties that are officially designated as modified accredited areas, or are in the process of accreditation, then a permit must first be obtained from the secretary and executive officer of the State livestock sanitary board, permitting the shipment in quarantine at destination; and such steers shall be branded on the right jaw with the letter "F."

4. Cattle for the purpose of immediate slaughter may be transported or shipped from South St. Paul Union Stockyards and from public stockyards in other States to points in Minnesota, on receipt of a permit from the secretary and executive officer of the State livestock sanitary board. Such cattle must be slaughtered within 10 days, and during this interval must be held separate and apart from any other cattle.

5. Cattle from an area officially certified by the sanitary authorities of the State of origin and the Federal Bureau of Animal Industry as a modified accredited tuberculosis-free area may be transported or shipped into Minnesota, provided they originate immediately at the time of shipment from a herd in such an area in which no reactors were disclosed on the last official tuberculin test, if accompanied by a proper health certificate showing such origin, and indorsed or approved by the sanitary official of the State of origin; but when such cattle are brought into counties that are officially designated as modified accredited areas, or are in the process of accreditation, they shall be quarantined and retested at owner's expense, as provided in paragraph 2.

6. All purebred cattle or cattle represented to be purebred, when brought into Minnesota for dairy and breeding purposes, unless they originate from a Federal-State accredited tuberculosis-free herd, will be quarantined at destination and retested not earlier than 60 nor later than 90 days after entrance, at the owner's expense.

7. The intradermic tuberculin test will be accepted provided the test chart shows that observations are

made at the seventy-second hour after injection. A second observation, between the one hundred and twentieth and one hundred and fiftieth hours after injection, shall be made in all tests of cattle after their removal from their original herd, and in all tests of cattle that disclose reactors on the seventy-second hour.

8. The physical examination, tuberculin test, health certificate, and tuberculin test chart required by paragraph 1 of these rules and regulations shall be applied and issued within 60 days prior to importation or bringing of cattle into Minnesota, by a veterinarian of the State of origin who shall have been authorized by such State, and approved by the Federal Bureau of Animal Industry to apply the test, make the examinations, and issue the certificate and test chart; or by a veterinary inspector of the Federal Bureau of Animal Industry, at a public stockyard or other regular bureau station: *Provided, however,* That cattle originating from State and Federal accredited tuberculosis-free herds may be imported or brought into Minnesota within one year from the date of last official tuberculin test if accompanied by a proper health certificate showing the number of the certificate of accreditation and indorsed or approved by the sanitary official of the State of origin: *And provided further,* That cattle originating from herds under State and Federal supervision for the eradication of tuberculosis under the accredited-herd plan, and in which herds no reactors were disclosed, may be imported or brought into Minnesota within six months from date of the last official, complete herd test, and cattle originating from officially designated modified accredited tuberculosis-free areas, in which herds no reactors were disclosed, may be imported or brought into Minnesota within a period of three years from date of last official test, if accompanied by a proper health certificate showing such origin and indorsed or approved by the sanitary official of the State of origin; but such cattle shall be quarantined and retested at owner's expense, as provided in paragraph 2.

9. The health certificates, including the record of tuberculin test, shall show the number of cattle included in the test and the number of reactors disclosed and, provided further, shall include a full description of the animals tested as purebred or grades. Purebred cattle shall be described by name of breed, official registry number and name, sex, and age. Grade

cattle shall be identified by color, markings, sex, approximate age, and by proper official metal tag bearing a serial number, and securely fastened in the right ear.

*Hogs.*—1. All swine imported or brought into Minnesota for the purpose of immediate slaughter must be consigned to approved slaughterhouses where the Federal Government maintains inspection.

2. Purebred swine may be imported by express in crates when accompanied by affidavit of the owner, countersigned by the authorities of the State of origin, to the effect that said swine, to the best of his knowledge and belief, are not affected with cholera, necrobacillosis, or other contagious, infectious, or communicable swine diseases, and that cholera has not existed on the premises from which said swine have been removed for a period of not less than 60 days immediately prior to date of shipment; also that said swine have been immunized with a protective dose of hog-cholera serum not more than 15 days prior to date of importation when the serum alone is used, or with serum-and-virus treatment not less than 30 days prior to date of importation; copy of said countersigned affidavit must be mailed to the livestock sanitary board of Minnesota.

3. Swine from public stockyards, for purposes other than immediate slaughter, may be imported or brought into the State only when shipped in compliance with the regulations of the United States Bureau of Animal Industry and when shipments are made within 24 hours after immunization and dipping. Permits for such shipments must first be obtained by applying in writing to the executive office of the State livestock sanitary board. Such shipments must be held in quarantine at destination for at least 21 days and until the inclosures have been properly cleaned and disinfected. Cleaned and disinfected cars or other vehicles only shall be used for shipment.

4. All other shipments or bringing of swine into Minnesota must be made in clean and disinfected cars or other means of conveyance and must not be unloaded in public stockyards or stock pens where trading in livestock is conducted. They must also be accompanied by a health certificate issued by an approved veterinarian, showing them to have been immunized, as required in paragraph 2.

*Sheep.*—All sheep imported into Minnesota for purposes other than immediate slaughter must be accompanied by health certificates indicating that they are

free from any symptoms of scabies or exposure thereto within 30 days prior to shipment, and they must be shipped in clean and disinfected cars.

All sheep shipped through public stockyards into Minnesota for purposes other than immediate slaughter must be dipped, before entry, under the supervision of an inspector of the Bureau of Animal Industry.

*Dogs.*—All dogs shipped, transported, or moved into Minnesota for any purpose, with the exception of performing dogs shipped for a limited period of time within the State, must be accompanied by a certificate of health issued by the State or Government veterinary officials, or by an approved veterinarian and approved by the State or Government officials of the State of origin, stating that rabies has not existed for the last nine months within a radius of 50 miles of the point of origin, and that the said animals are free from symptoms of any communicable disease.

*Who may inspect.*—Veterinary inspectors of the Federal Bureau of Animal Industry, State and deputy State veterinarians, graduate veterinarians whose certificates of health and inspection are indorsed by officials in charge of livestock-sanitary control work in State from which the animals are shipped, and veterinarians authorized to issue health certificates by the Chief of the Bureau of Animal Industry, United States Department of Agriculture.

Certificates of health must accompany the shipment of stock and indorsed copies must be immediately mailed to the livestock sanitary board, Old Capitol Building, St. Paul, Minn.

All mallein tests must be made within 30 days of shipment.

*Official.*—Secretary and executive officer, State livestock sanitary board, Old Capitol Building, St. Paul.

## MISSISSIPPI

*Horses, mules, asses.*—All horses, mules, jacks, and jennets brought into the State of Mississippi shall be accompanied by a health certificate, stating that such animals are free from symptoms of equine influenza or shipping fever and any other contagious or infectious diseases, and to determine the absence of such diseases a clinical examination, including temperatures of each animal, taken not more than 24 hours prior to loading, shall be required, such examinations to be made, and such certificates issued by a veterinarian authorized

by the authorities of the State in which the shipment originated, and approved by the United States Bureau of Animal Industry. Any animal having a temperature above 102° F. shall be rejected. A copy of the certificate including the temperature of each animal shall be forwarded immediately by the veterinarian making the examination to the State veterinarian, Jackson. The mallein test may be required at owner's expense, at point of destination, at the discretion of State veterinarian.

*Cattle.*—All oxen, bulls, and female cattle, more than 6 months of age, brought into Mississippi, shall be accompanied by a health certificate stating that such animals are free from any contagious or infectious disease, and to determine the absence of tuberculosis all such cattle shall be tested with tuberculin, and a negative reaction obtained, before entering the State, such test to be made and such certificate issued by a veterinarian authorized by the proper authority of the State in which the cattle originate and approved by the United States Bureau of Animal Industry.

Steers other than oxen may be brought into the State on affidavit of the owner that such steers are for feeding and grazing purposes and have not been used as oxen prior to shipment into Mississippi.

All cattle originating in any area quarantined on account of ticks (*Margaropus annulatus*) shall also have a Federal certificate indicating that such cattle are free of ticks and that movement is made in accordance with Federal regulations governing the interstate movement of livestock.

At the discretion of the State veterinarian all cattle brought into Mississippi in accordance with paragraph 1 of this regulation may be retested at owner's expense, by a veterinarian approved by the State veterinarian.

*Hogs.*—Health certificate or affidavit of owner, indicating freedom from any communicable disease or exposure to such diseases within a period of six months prior to shipment. One copy of certificate must be forwarded, at time of shipment, to the State veterinarian, Jackson.

*Sheep.*—Same as requirement for hogs.

*Who may inspect.*—Approved veterinarians, veterinary inspector of the Bureau of Animal Industry.

*Official.*—State veterinarian, Jackson.

## MISSOURI

*Horses, mules, and asses.*—None.

*Cattle.*—Federal regulations apply.

Cattle for breeding or dairy purposes must have a health certificate, including the tuberculin test, by a graduate veterinarian approved by the official of the State of origin and by the United States Bureau of Animal Industry or by a veterinary inspector of that bureau.

Cattle for feeding or grazing purposes, of the beef breeds only, are admitted without the tuberculin test on special permit issued on application to the State veterinarian or a representative of the Federal Bureau of Animal Industry, accompanied by an affidavit that the cattle will be used for feeding or grazing purposes and not for breeding or dairy purposes. All cattle for feeding or grazing purposes must be held in quarantine on the premises of the consignee until shipped to some public livestock market or until tuberculin tested and released by order of the State veterinarian.

*Hogs.*—Federal regulations govern all hog shipments from public livestock markets or other points outside the State under Government supervision.

Hogs shipped by freight from one point to another within the State or from outside points not under Federal supervision to points within the State must be accompanied by a certificate of health issued by an authorized graduate veterinarian showing that the hogs have been immunized against cholera. If no competent graduate veterinarian is available at point of origin, the State veterinarian of Missouri may issue special permit for the hogs to be shipped subject to inspection, immunization, and quarantine at destination at the owner's expense.

No inspection is required for hogs shipped to public markets or for purebred hogs shipped in crates by express.

*Sheep.*—None.

*Who may inspect.*—*Cattle:* Federal veterinarian or veterinarian approved by the State and by the Federal Bureau of Animal Industry.

*Other inspections:* Official veterinarian, State or Federal, or graduate veterinarian, whose certificate shall be approved in writing by State veterinarian or like officer.

*Official.*—State veterinarian, Jefferson City.

## MONTANA

*Horses, mules, and asses.*—Health certificate, including mallein test except that for wild and unbroken range animals no mallein test is required, but they must have clinical health certificate and be given clinical inspection; except also animals for temporary racing, exhibition, or speed purposes, for which no certificate is required.

Stallions and jacks must be mallein tested and have certificate of soundness. Original of this certificate must accompany shipment and one copy be mailed to stallion registration board at Bozeman, Mont., at least 10 days before shipment into the State. Only purebred or grade stallions or jacks are admitted for breeding purposes. A "grade" is defined as an animal whose sire or dam (but not both) is a registered purebred animal.

Horses, mules, and asses for which the mallein test is required, as above, may be shipped in without inspection to quarantine yards at Miles City, Billings, or Dillon, provided the waybills bear notation "Consigned to quarantine yards at ———, Mont."

*Cattle.*—All cattle shipped into the State must be accompanied by tuberculin-test charts, with the following exceptions: Strictly range cattle except bulls, shipped directly from range sections of Arizona, California, Colorado, Idaho, New Mexico, Nevada, Oklahoma, Oregon, Texas, Utah, Washington, Wyoming, North Dakota, and South Dakota west of the Missouri River, Kansas and Nebraska west of the one-hundredth meridian, Alberta, Saskatchewan, and British Columbia, clinical health certificates only.

Cattle from public-sales yards, with the exception of range cattle certified by the Federal inspector in charge as coming directly from range sections mentioned above, must be accompanied by a Federal-approved tuberculin-test chart.

Cattle from Federal-State accredited herds may be brought in when accompanied by a statement from the livestock sanitary board or the United States Bureau of Animal Industry and the owner or his agent that the cattle are from an official accredited tuberculosis-free herd which has been tested within 12 months of the date of shipment and are free from symptoms of communicable disease. In such cases a copy of the last previous tuberculin test of the animals shipped must be forwarded to the State veterinary surgeon,

and the tuberculosis-free accredited-herd certificate number given.

Cattle from an area officially certified by the sanitary authorities of the State of origin and the Federal Bureau of Animal Industry as a modified accredited tuberculosis-free area may be transported or shipped into Montana: *Provided*, That they originate immediately at the time of shipment from a herd in such area in which no reactors were disclosed on the last official tuberculin test, if accompanied by a proper health certificate showing such origin, and indorsed or approved by the sanitary official of the State of origin.

All purebred and dairy cattle from other than Federal-State accredited tuberculosis-free herds must be held in quarantine after arrival at destination, subject to a tuberculin retest in not less than 60 days. This test will be made free of charge.

*Swine.*—Swine for breeding or feeding purposes must be accompanied by a health certificate, stating that the animals are free from any infectious or contagious disease and that they do not come from a public stockyard or a district in which hog cholera has existed during the past three months; and provided that the animals have not been subjected to the serum-and-virus treatment within 30 days immediately prior to date of shipment.

Swine may be shipped from a district where hog cholera has existed during the past three months: *Provided*, That they have been properly immunized by the use of anti-hog-cholera serum only within 15 days of shipment or have been subjected to the serum-and-virus treatment not less than 30 days previous to date of shipment: *And provided further*, That they have been kept on premises or a farm on which hog cholera has not existed for the last three months: *Provided further*, That they have been properly dipped just previous to their shipment in a solution recognized by the Federal Bureau of Animal Industry.

*Swine for slaughter.*—Health certificate or statement by the shipper or owner that they will be shipped direct to an abattoir and slaughtered within seven days after arrival at destination.

*Purebred swine.*—Purebred swine transported in crates by express will be admitted into the State when accompanied by an affidavit of the owner or his agent to the effect that said swine, to the best of his knowledge and belief, are not affected with hog cholera or

any other communicable disease and that hog cholera has not existed on the premises from which said swine have been removed for a period of not less than three months immediately prior to date of shipment. Also that said swine have not been subjected to the serum-and-virus treatment within 30 days immediately prior to date of shipment.

*Swine for exhibition.*—All swine to be exhibited in the State at State or county fairs must be accompanied by health certificate stating that they are free from any symptoms of an infectious or contagious disease and that they have been properly immunized with the use of anti-hog-cholera serum only within 15 days of shipment, or that they were subjected to the serum-and-virus treatment not less than 30 days immediately prior to date of shipment.

*Hog-cholera serum.*—All anti-hog-cholera serum sold within the State or imported into the State for sale, distribution, or use, shall be produced under license granted by the Federal Bureau of Animal Industry.

*Hog-cholera virus.*—All serum manufacturers are hereby prohibited from shipping any virulent blood or hog-cholera virus into the State unless written permission for each shipment is granted by the State veterinary surgeon.

*Sheep.*—All sheep shipped or trailed into the State must be accompanied by a health certificate issued by an approved graduate veterinarian certifying that the sheep are free from any symptoms of an infectious or contagious disease, and have not been exposed to scabies for a period of at least six months preceding date of inspection.

It being recognized by sanitary authorities that public stockyards should be construed as infected premises, and as railway loading yards and chutes may likewise be infected, and as sheep scabies may not become apparent or visible for 90 days or longer, it is hereby ordered that all sheep shipped or trailed into the State must be shipped in to quarantine, and quarantined for a period of not less than 90 days and until inspected and released by a representative of the Montana livestock sanitary board.

All sheep shipped or trailed into the State must be quarantined at the nearest practical place to their point of unloading or entry. The sheep will be quarantined upon an area consistent with good sanitation, and which will not endanger or contaminate the range of sheep which are not under quarantine or the trails

used in the moving of such sheep, or the water places frequented by sheep not under quarantine.

Sheep trailed into the State must be held at the State lines unless accompanied by a trail permit issued by the Montana livestock sanitary board.

Sheep shipped in by a common carrier must be shipped in clean and disinfected cars and must be held in the railway stockyards or premises until permission is granted by the Montana livestock sanitary board to remove them from the railway stockyards or premises to the place of quarantine.

The owner of the sheep or his agent must give the State veterinary surgeon at Helena at least five days' notice in writing of the time and place of arrival, and number and character of sheep in the shipment.

All imported sheep when placed in quarantine must be branded with red paint on the right side of the back with the letter "S."

Sheep shipped from a public-sales yard which are not dipped at that point and accompanied by a Federal dipping certificate must be dipped twice at the first available point after unloading or trailing into the State, and must be quarantined as directed and otherwise comply with the regulations governing imported sheep, the quarantine period to date from the date of second dipping.

All rams and purebred sheep shall be dipped twice, provided, however, that purebred sheep shipped by express or in disinfected cars or in box cars which have not contained other sheep shipments and which are not unloaded en route or loaded through public stockyards need not be dipped, but must otherwise comply with the regulations governing imported sheep.

Rams and purebred sheep shipped into the State of Montana must be quarantined in one lot or band for not less than 90 days and until they have been inspected and released from quarantine; provided, however, that one or more Montana sheep owners shipping bucks in the same car or cars, may have their bucks quarantined on their individual ranches.

Rams, purebred sheep, and other sheep shipped into the State for sale or distribution must be quarantined in one lot or band for not less than 90 days and until they have been inspected and released from quarantine; provided, however, that such sheep may be dipped twice under official supervision after their arrival in Montana and then distributed to individual ranches and quarantined on such ranches for not less than 90 days and until inspected and released from quarantine.

Where it is necessary to turn native sheep in with quarantined imported rams, the native sheep must likewise be quarantined and comply with the regulations governing the imported sheep. Where native sheep are mixed with quarantined imported rams the owner or agent of the sheep will forward notice to the State veterinary surgeon at Helena immediately, stating the number of animals added to the quarantined rams.

*Disinfection of cars.*—Disinfection of cars does not apply to box cars which have not been previously used for stock shipments.

*Dogs.*—All dogs shipped into the State for any purpose whatsoever, except performing dogs for temporary stay within the State, must be accompanied by a statement from the State or Government health officer or the State veterinarian certifying that rabies has not existed for the last nine months within a radius of 50 miles of origin of shipment, and also a statement from the owner or agent of the animals that the dog or dogs are free from disease and have since birth or during the last nine months been at all times within the radius designated by the official health officer or State veterinarian, and have not been exposed to rabies.

Dogs which can not comply with these requirements may be shipped into Montana when accompanied by an official health certificate showing them to be free from infectious or communicable diseases, and certifying that they have been vaccinated with killed rabies vaccine not more than 6 months and not less than 30 days prior to date of shipment.

Original statement and health certificate must accompany shipment, and a copy be immediately forwarded the State veterinary surgeon, Helena.

*Certificates.*—Health certificates and test charts are good for 30 days. Test charts for show herds good for 60 days. The original certificate must accompany shipment to its destination, and duplicate must be forwarded immediately by the veterinarian making the inspection or test to the State veterinary surgeon.

*Tests accepted.*—Any test approved by the Federal Bureau of Animal Industry will be accepted.

*Who may inspect.*—Any veterinarian approved or accredited by the Federal Bureau of Animal Industry.

*Official.*—State veterinary surgeon, Helena.

## NEBRASKA

*Horses, mules, and asses.*—Official health certificate, including a record of mallein test for stallions and jacks

certifying that the animals described on certificate have been examined, and where required mallein tested within 60 days prior to the date of importation, and found to be free from any symptoms of glanders or any other contagious, infectious, or communicable disease.

*Cattle.*—Cattle for breeding and dairy purposes (to include all cattle of recognized dairy type or breed), official health certificate and tuberculin-test chart certifying that the cattle described on certificate and chart have been examined and tuberculin tested within 60 days prior to date of shipment and found to be free from tuberculosis and symptoms of other dangerous, contagious, infectious, or communicable disease: *Provided*, That (1) cattle immediately preceding shipment from a herd officially accredited tuberculosis free, and cattle from a herd located immediately at time of shipment within an area certified officially as a modified tuberculosis-free area, which herd on last test passed without reactors, may be imported without additional tuberculin test, but shall be accompanied by an official health certificate and statement certifying origin in keeping with these provisions; (2) cattle for exhibition purposes may be imported on tuberculin test dated 120 days preceding date of importation.

Steers and strictly range cattle, official health certificate, but when direct from a range herd of another State where inspection and physical examination is impracticable importation may be made subject to inspection at destination under special permit had and obtained from the Nebraska bureau of animal industry.

Cattle for immediate slaughter to be reported by importer, giving Nebraska destination and record of slaughter, except for cattle destined to Union Stock Yards, Omaha.

Female cattle for feeding and grazing purposes, and bulls for feeding purposes, official health certificate, subject to quarantine at Nebraska destination and to be kept separate and apart from breeding and dairy cattle.

**NOTE.**—Cattle imported under breeding and dairy provisions are subject to 60-day retest at discretion of the Nebraska bureau of animal industry.

*Hogs.*—Swine except for immediate slaughter, official health certificate including statement showing same to have been immunized with anti-hog-cholera serum, provided special permission has been granted for treatment with serum at Nebraska destination. Immuni-

zation with anti-hog-cholera serum, provided special permission has been granted for treatment with serum at Nebraska destination. Immunization with anti-hog-cholera serum to be made in keeping with the following restrictions:

(a) Swine immunized by serum-alone method to be treated not more than 21 days immediately prior to date of importation. Swine immunized by simultaneous method will be quarantined for a period of 21 days following arrival at Nebraska destination provided treatment has been made less than 21 days immediately preceding the date of shipment of the swine into Nebraska. Certification of immunization to be by veterinarian on official health certificate, or by sworn statement of owner or shipper stating that the swine imported have been so treated, setting forth date and by whom treatment was made.

(b) Swine immunized at public stockyards where Federal inspection is maintained shall be quarantined for a period of 21 days on arrival at destination, to be kept separate and apart during such period from other swine not similarly treated.

(c) Except swine for feeding purposes, treatment with anti-hog-cholera serum must precede the shipment into the State. Swine for feeding purposes only may be imported subject to treatment with anti-hog-cholera serum on arrival at Nebraska destination, but such swine will be subject to quarantine for 21 days and must be loaded direct into cleaned and disinfected cars without contact to railroad shipping yards except where same have been cleaned and disinfected in preparation for shipment.

Swine for feeding purposes under these provisions may be imported only on permit from the Nebraska bureau of animal industry had and obtained prior to shipment.

Swine for immediate slaughter or any other purposes may be moved without restriction to a market where Federal inspection is maintained.

*Sheep.*—Official health certificate, including a statement of inspection showing same to be free from scabies or any other contagious, infectious, or communicable disease; *Provided*, That where such inspections are impracticable for sheep from range flocks or bands for feeding purposes only, the same may be imported subject to inspection at destination, this to be upon permit had and obtained from the Nebraska bureau of animal industry prior to shipment.

*Who may inspect.*—Federal or regularly employed State veterinarians, or practicing veterinarians approved by the Federal Bureau of Animal Industry and State officials for tuberculin testing of livestock for interstate shipment. Health certificates are to be indorsed by the livestock sanitary officials of the State of origin.

*Change in regulations.*—Regulations subject to change at any time necessity demands.

*Special notice to railroads.*—Except when special permit is had and obtained for inspection of livestock at their Nebraska destination, railroad officials shall under no circumstances accept livestock for shipment into Nebraska unless accompanied by proper health certificate and tuberculin of mallein-test chart as required.

*Official.*—Chief, Nebraska bureau of animal industry, Statehouse, Lincoln.

## NEVADA

*General requirements.*—The term "official health certificate" means a certificate setting forth in detail facts called for and issued by officials authorized to inspect and must be upon official forms issued by the United States Bureau of Animal Industry or the livestock sanitary authorities of States of origin.

A copy of each health certificate or affidavit must be attached to the waybill or be in the possession of the person in charge of the stock moving into the State if by other means than by rail, and one copy must be forwarded to the State quarantine officer so as to reach him before the arrival of the stock at destination.

*Horses, mules, asses.*—Official health certificate showing freedom from any evidence of glanders, dourine, or other communicable disease and external parasites, based on a thorough physical examination.

*Cattle.*—No cattle of any age or class shall be shipped, driven, or transported into the State for any purpose whatsoever except on a permit obtained from the State quarantine officer in advance of entering the State. Such permits may be granted upon application made in accordance with certain provisions of the regulations. Full information concerning those provisions should be obtained from the State official. All permits so granted shall cover the movement of the cattle involved only to the point of destination specified therein, where they are to be held until released by the

State quarantine officer in writing after such inspection or tuberculin test as he may deem advisable.

If on inspection at destination by the State quarantine officer or his representative the cattle covered by any permit are found to belong in a class other than as set forth in the application for the permit, they will be automatically reclassified and become subject to disposition in accord with the classification in which they actually belong, as set forth in the regulations.

For dairy and breeding cattle, including all bulls for use on the open range, except those from accredited tuberculosis-free herds, application for permit shall be accompanied by a waiver of indemnity prepared after the following form:

In consideration of being permitted to bring the ——— head of dairy or breeding cattle covered by the health certificate to which this waiver is attached, into the State of Nevada, I or we do hereby agree:

*First*, to hold the said cattle at ———, Nevada, their destination, in quarantine properly isolated from contact with other cattle subject to inspection or tuberculin test until their release in writing by the State quarantine officer.

*Second*, that in the event that any of the said cattle shall within 70 days after their arrival at destination react to any recognized form of tuberculin test, they shall be at once returned to the point of origin if same be allowable by law or destroyed without the payment of any indemnity by the State of Nevada, as directed by the State quarantine officer.

Signed ———, *Owner*,  
P. O. address ———.

Witnessed by  
———,  
P. O. address ———.

In addition the animals shall be covered by an official health certificate showing them to be free of any evidence of tuberculosis or other contagious, infectious, or communicable disease and to be from a herd or herds showing not more than 10 per cent of tuberculous cattle, based upon an individual physical examination and a tuberculin test of the entire herd or herds.

When the subcutaneous method of applying the tuberculin test is used the chart shall show that at least

three temperatures were taken 2 or 3 hours apart before injection of tuberculin; that at least seven temperatures were taken 2 hours apart after the injection, beginning not later than 8 hours after the injection of tuberculin; and that the test had run for a period of not less than 20 hours after the injection.

When the intradermic test is used the chart shall show that an observation made not earlier than the ninety-sixth hour has failed to show any evidence of a reaction.

For cattle from a tuberculosis-free accredited herd under the supervision of the Bureau of Animal Industry, United States Department of Agriculture, and the State of origin, application for permit shall be accompanied by a waiver of indemnity against the State of Nevada executed as set forth above and an official health certificate from an inspector of the United States Bureau of Animal Industry or the authorities of the State of origin showing the cattle to be from such a herd and that they have not been exposed to infection by tuberculosis since leaving the herd of origin.

For cattle for feeding or grazing purposes only—that is, cattle to be fed in yards or grazed on inclosed premises for a limited period only—application for permit shall state the number, sex, age, and point of origin of the cattle, also the length of the proposed feeding period, location of premises where cattle are to be fed, and disposition at end of feeding period.

For cattle which have reacted to the tuberculin test, application for permit shall be accompanied by evidence that the regulations of the United States Bureau of Animal Industry have been complied with and full details as to the purpose of the shipment.

For cattle for immediate slaughter, application shall be accompanied by a statement as to the number and description of the cattle and the name and address of the establishment where they are to be slaughtered.

For strictly range cattle—that is, branded animals of the recognized beef type only which have been born and reared under range conditions—application for permit shall contain a statement as to the number, ages, sexes of the cattle, and the location of the range on which they originated; also the range on which they are to be turned after arrival at destination.

*Swine.*—Purebred swine for breeding or exhibition purposes may be imported in crates by express upon affidavit of the owner that he is the breeder or owner,

that they are purebred animals for breeding or exhibition, that they are not affected with hog cholera and have not been exposed thereto for at least 60 days nor been given the serum-and-virus treatment within 30 days, and that immediately before shipment they were dipped in a 2 per cent solution of compound cresol U. S. P. or other standard solution of equal strength.

Swine from public stockyards may be imported in accordance with Federal regulations. Such swine will be held in quarantine at destination until released by the State quarantine officer.

Swine for immediate slaughter may be brought in without inspection provided they are consigned direct to a slaughtering establishment, the waybills are marked for immediate slaughter, no part of the shipment is diverted en route within the State, and that they are slaughtered within a reasonable time.

For swine not belonging to the above-named classes a permit must be procured from the State quarantine officer. Application for such permit must give name of shipper, point of origin, number of animals, method of transportation, name of consignee, and destination. Such animals will be quarantined at destination until released by the State quarantine officer.

*Other classes of livestock.*—Livestock (except sheep and goats) not provided for above may enter only on special permit from the State quarantine officer.

*Who may inspect.*—Federal veterinarians, livestock sanitary authorities of States of origin, or inspectors jointly approved by the Federal bureau and such State authorities for making interstate inspections in accordance with Federal regulations.

*Official.*—State quarantine officer, University of Nevada, Reno.

*Sheep.*—All persons intending to bring sheep into Nevada in any manner, except by shipping them through the State by railroad shall, 10 days before crossing the State line, notify the board, at its office, of such proposed action, which notice shall set forth the place and date of entry into the State, the number of sheep or bucks, the marks or brands thereon, the name of the owner or owners thereof, the locality from which sheep came and through which they have been driven.

All sheep entering Nevada shall be accompanied by a health certificate, issued by a duly authorized sheep inspector, or by an inspector of the bureau of animal industry, certifying that the sheep are free of disease

or exposure thereto and are from a district in which sheep scabies has not existed for the preceding six months. Sheep not accompanied by the above-described certificate shall be dipped twice, both dip-pings to be performed under the supervision of an authorized sheep inspector and within 24 days after the entry of the sheep into the State.

Notice to be sent to State board of sheep commissioners, Box 782, Reno.

*Official.*—Secretary, State board of sheep commissioners, Reno.

## NEW HAMPSHIRE

*Horses, mules, and asses.*—Health certificates showing them to be free from contagious or infectious diseases and nonparasitic.

*Cattle.*—Health certificate, including the tuberculin test, as recognized by the Bureau of Animal Industry, for all cattle except calves under 6 months old.

*NOTE.*—*Federal regulations require that all calves must be tuberculin tested before they are shipped interstate.* Permits allowing shipments will be issued on receipt of test charts approved by the proper livestock sanitary officials of the State in which the shipment originates, or signed by a qualified inspector of the Federal Bureau of Animal Industry. Unless the cattle come from herds under State and Federal supervision or have been tested by an accredited veterinarian, they must be held for a 60-day retest at owner's expense.

*Hogs.*—Health certificate, stating freedom from hog cholera and other infectious disease, based on a physical examination made by a qualified inspector.

*Sheep.*—None.

*Who may inspect.*—Veterinarians approved by proper livestock sanitary officials of the State of origin, or Federal Bureau of Animal Industry inspector.

*Officials.*—Commissioner of agriculture, division of animal industry, Concord, State veterinarian, Concord.

## NEW JERSEY

*Horses, mules, and asses.*—Must be free from infectious or contagious disease.

*Cattle.*—(a) Cattle for immediate slaughter may be shipped only to public stockyards or recognized slaughtering centers where Federal inspection is maintained.

(b) The importation of meat cattle for immediate slaughter is prohibited except as provided in paragraph *a* unless permission for such importation in writing is obtained from the chief, New Jersey bureau of animal industry, Trenton, at the time shipment is made.

(c) Bulls, cows, and heifers for immediate slaughter when not consigned to public stockyards or recognized slaughtering centers where Federal inspection is maintained must be accompanied by a tuberculin-test chart approved by the sanitary official of the State of origin covering test made in accordance with the regulations adopted by the New Jersey board of agriculture as outlined in paragraph *e*.

(d) Neat cattle for dairy or breeding purposes must be accompanied by a tuberculin-test chart approved by the sanitary official of the State of origin covering test made in accordance with the regulations as adopted by the New Jersey board of agriculture as outlined in paragraph *e*.

(e) The New Jersey board of agriculture has approved and adopted the following methods of tests of cattle intended for shipment into New Jersey:

(1) Subcutaneous, ophthalmic, and intradermic tuberculin tests of cattle from herds under supervision, in accordance with the accredited herd agreement.

(2) Subcutaneous, intradermic, subcutaneous-ophthalmic combination and intradermic-ophthalmic combination tuberculin tests when made by regularly employed Federal or State veterinarians.

(5) Subcutaneous and subcutaneous-ophthalmic combination tuberculin tests made by approved veterinarians acceptable to the New Jersey board of agriculture.

No other tests will be accepted.

(f) All shipments are to be held in quarantine on arrival at destination until inspected and released by a representative of the New Jersey bureau of animal industry.

(g) Such cattle not identified by registration number and name shall be identified by a proper metal ear tag.

(h) Notification by telephone or telegraph shall be made to the chief, New Jersey bureau of animal industry, Trenton, within three days immediately following the arrival of any cattle in the State.

*Swine.*—(a) Swine for immediate slaughter may be shipped into the State when consigned to designated slaughter establishments where Federal inspection is maintained.

(b) Swine for immediate slaughter may be shipped into New Jersey on special permit obtained from the chief, New Jersey bureau of animal industry, Trenton, to points where Federal inspection is not maintained, and slaughtered under State or municipal inspection.

(c) Swine for feeding or breeding purposes may be imported into New Jersey when said swine have been immunized with a protective dose of hog-cholera serum and virus prior to date of importation, provided they are moved in clean and disinfected cars.

Such shipment must have copy of the veterinarian's certificate of inoculation attached to the waybill and a copy forwarded immediately to the chief, New Jersey bureau of animal industry, Trenton.

(d) Request for the importation, into New Jersey, of untreated swine from points other than public stockyards for feeding or breeding purposes must be made to the chief, New Jersey bureau of animal industry, Trenton.

When such permit is granted the swine shall be moved in clean and disinfected cars, held in quarantine at destination, and immediately treated with a protective dose of hog-cholera serum and virus. Report of same shall be made at once to the chief, New Jersey bureau of animal industry, Trenton, on blanks supplied by the bureau, in accordance with the requirements of the New Jersey board of agriculture.

*Sheep.*—Must be free from infectious or contagious diseases.

*Who may inspect.*—Official veterinarians of the State or veterinarians approved by the Federal and State bureaus for such inspection.

*Official.*—Chief, New Jersey bureau of animal industry, Trenton.

## NEW MEXICO

*Horses, mules, and asses.*—Health certificate.

*Cattle.*—Health certificate, including tuberculin test for dairy cattle and cattle intended for the breeding of dairy stock, and retest 90 days after reaching destination.

Any bulls shipped into the State of New Mexico, to be used for range purposes, must be accompanied by a permit from the cattle sanitary board, Albuquerque, and also a certificate from a State recognized inspector

or veterinarian, or an inspector of the Federal Bureau of Animal Industry, showing said shipment of bulls to have been dipped in some recognized scabies dip not more than 10 days prior to shipment, copy of certificate to be mailed to the cattle sanitary board, Albuquerque.

*Hogs.*—Subject to laws of 1915, 1917, and 1919. Details may be obtained from the cattle sanitary board, Albuquerque.

*Official.*—Secretary, cattle sanitary board, Albuquerque.

*Sheep.*—Any person intending to bring sheep or goats into the State of New Mexico shall give notice to the secretary of the sheep sanitary board of New Mexico by registered letter or telegram or by delivery in person so that said notice shall be received at least 48 hours prior to the proposed day of entry, stating in said notice the kind and number of sheep to be imported, the proposed day, and place of entry. Said secretary shall then issue permission to import said sheep provided they are accompanied by a certificate of an authorized inspector of the State of origin or an inspector of the United States Bureau of Animal Industry, certifying that said sheep have been dipped within 10 days prior to the day of entry, in a dip recognized by the United States Bureau of Animal Industry for the eradication of sheep scabies, and are free from scabies or exposure thereto; or that said sheep be routed to a dipping vat where the sheep sanitary board of this State can have one of its inspectors supervise the dipping for scabies, after which the said inspector will issue to the owner or person in charge a certificate of official dipping, unless said sheep to be imported are for show or slaughter purposes or are in transit from one State to another.

An inspection fee of three cents a head must be paid for all classes of sheep and goats coming into New Mexico.

*Who may inspect.*—Sheep must be inspected by a Federal veterinarian before shipment and by State or Federal inspector at destination.

*Official.*—Secretary, sheep sanitary board, Albuquerque.

## NEW YORK

The movement, into the State of New York, of domestic animals suffering from any contagious or infectious disease is prohibited, and persons bringing such animals into the State are held responsible.

*Horses, mules, and asses.*—Must be free from infectious or contagious disease.

*Cattle.*—All cattle for dairy or breeding purposes must be tuberculin tested by the combination method—either the subcutaneous and ophthalmic in combination or the intradermic and ophthalmic in combination. In the case of animals from infected herds, test must be made within 60 days prior to shipment. Cattle must be from clean herds and accredited herds, in accordance with the regulations of the United States Bureau of Animal Industry governing the interstate movement of livestock. All tests to be made by official, accredited, or authorized veterinarians.

All female cattle and bulls for feeding and grazing purposes must be tuberculin tested.

Steers for feeding and grazing purposes, when shipped into tested or quarantined towns or counties, must be tuberculin tested.

All shipments must be accompanied by proper health certificate indorsed by the livestock authorities of the State of origin. Such certificate should indicate whether the cattle are from accredited herds, modified accredited areas, or from herds under Federal and State supervision. Cattle from herds not under Federal and State supervision may be quarantined for a 60-day retest. The test chart should set forth (legibly) the correct name and address of the consignor and consignee. No permit is necessary to make shipment.

*Hogs.*—Hogs must be free from contagious or infectious disease. If shipped for purposes other than immediate slaughter, they must be in cleaned and disinfected cars, pens, etc. (See New York State Department Order No. 6, dated September 15, 1927.)

*Sheep.*—Sheep must be free from contagious or infectious disease.

*Note.*—The commissioner may order any animals coming into the State to be detained at any place or places for inspection and examination, and if they are found to be affected with any communicable disease they shall be condemned and slaughtered or held in strict quarantine.

*Who may inspect.*—Federal, State, and county veterinarians, accredited veterinarians, and veterinarians authorized to test cattle for interstate shipment.

*Official.*—Director, bureau of animal industry, Albany.

## NORTH CAROLINA

*Horses, mules, and asses.*—Health certificate issued by recognized qualified veterinarian not more than 30 days prior to shipment, showing freedom from any contagious or infectious disease; except that horses and mules may be brought in without such certificate if the owner quarantines the animals at destination until they have been examined by a veterinarian designated by the State veterinarian and are found free from any symptoms of communicable disease, a certificate to that effect signed by the veterinarian making the test to be sent to the State veterinarian. The cost of quarantine and examination shall be at the expense of the owner.

*Cattle.*—All cattle for dairy, breeding, or show purposes, health certificate, and tuberculin-test chart issued by a recognized qualified veterinarian. Test must comply with requirements of the United States Bureau of Animal Industry. Copies of test chart and health certificate must be attached to waybill.

Cattle from tuberculosis-free accredited herds or from herds under State and Federal supervision will be admitted if accompanied by a certificate issued by livestock sanitary officials of the State of origin or by the United States Bureau of Animal Industry certifying that the cattle are from such herds and have been tested within a reasonable time prior to shipment.

The health certificate covering cattle other than steers and those admitted for immediate slaughter must show that the animals have satisfactorily passed a blood test for bovine infectious abortion made by a recognized laboratory not more than 21 days prior to entry into the State and not less than 15 days following abortion or normal parturition. The date of test, results, and name of laboratory must be given.

Cattle for immediate slaughter may be shipped into State without health certificate or test chart if consigned to a person holding a permit from the State veterinarian to receive them.

*Hogs.*—If for feeding, breeding, sale, or show purposes, a health certificate from a qualified veterinarian stating that the hogs are free from symptoms of communicable disease and that each animal has been properly treated with serum alone not more than 30 days or with serum and virus not less than 21 days prior to the shipment is necessary. The original certificate must be attached to the waybill and a copy forwarded to the State veterinarian, Raleigh. In an

emergency the State veterinarian may permit healthy swine to be brought in for feeding, breeding, sale, or show purposes without immunization, provided the following requirements are strictly complied with:

(a) A permit must be obtained from the State veterinarian before shipment is made.

(b) Swine must be apparently healthy and must be shipped in clean cars.

(c) They must be isolated at destination.

(d) They must be properly immunized on arrival at destination, and held in quarantine at least 21 days.

(e) They must be dipped in an approved disinfectant before being released from quarantine.

Purebred swine shipped by express must comply with the foregoing requirements or be accompanied by an affidavit of owner stating that the swine are not affected with a communicable disease, have not been exposed to a communicable disease, that no such disease has existed on the premises for a period of three months prior to shipment, and that the swine have not been treated with serum and virus within 30 days.

Swine from central markets or public stockyards for purposes other than immediate slaughter will be admitted only when shipped in compliance with the regulations of the Federal Bureau of Animal Industry and when shipments are made within 24 hours after immunization. Such shipments must be held in quarantine at destination not less than 21 days from date of immunization. Permits for such shipments must be obtained by applying in writing to the State veterinarian.

Swine for immediate slaughter will be admitted without restrictions if consigned to a recognized slaughtering center that has been approved by the State veterinarian. Waybills must be marked "For immediate slaughter" and the swine must not be used for any purpose other than immediate slaughter.

*Sheep.*—For breeding purposes, health certificate.

*Who may inspect.*—State veterinarian or any veterinarian whose certificate he will indorse, also Federal inspectors.

*Official.*—State veterinarian, Raleigh.

## NORTH DAKOTA

*Horses, mules, and asses.*—Health certificate, including mallein-test record, must be made within 30 days prior to entering the State. Stallions should

also be accompanied by certificates showing animals to be free from unsoundness, certificates of soundness for stallions to be forwarded to the stallion-registration board, Agricultural College.

*Cattle.*—All cattle entering the State must be accompanied by a certificate of health indicating that they are free from any symptoms of communicable disease.

All cattle that can be used for breeding or dairying purposes must be tuberculin tested within a period of 30 days of date of shipment and be accompanied by proper tuberculin-test chart health certificate, provided that cattle originating from a regularly Federal-State accredited tuberculosis-free herd will be admitted within a year of date of last test to conform with Federal regulations, and accompanied by proper test-chart health certificate.

All purebred cattle transported or driven into this State that have originated from other than Federal-State officially accredited tuberculosis-free herds must, after arrival at destination, be held segregated from other cattle for a period of not less than 60 days nor more than 90 days and be retested under the direction or approval of the livestock sanitary board.

The subcutaneous or thermal tuberculin test applied in conformance with the Federal rules for applying said test and applied by approved veterinarians will be recognized, provided calves under 6 months of age may be tested by the intradermic method to comply with Federal regulations.

The intradermic tuberculin test applied in combination with the ophthalmic tuberculin test in conformance with the Federal rules for such tests and made by accredited veterinarians will be recognized, provided that animals reacting to either test must be rejected.

*Hogs.*—Health certificate stating that no infectious swine disease exists or has existed in the locality from which the swine originated within six months prior to date of shipment, unless the swine are certified by a duly accredited Federal or approved veterinarian as having been immunized by the Dorset-McBride-Niles anti-hog-cholera serum only, within 30 days of shipment or have been immunized by the Dorset-McBride-Niles anti-hog-cholera serum and virus applied not less than 30 days of date of shipment.

Swine brought into the State for exhibition purposes at State or county fairs must be immunized in accord-

ance with the above provisions and be accompanied by certificate to such effect.

Purebred swine shipped by express in crates will be admitted if accompanied by affidavit of shipper approved by the State official in charge to the effect that such swine are free from disease and have not been exposed to hog cholera within a period of six months.

*Sheep.*—Health certificate indicating that animals are free from any symptoms of scabies or lip-and-leg ulceration, or exposure thereto, within 30 days prior to shipment.

*Dogs.*—All dogs shipped or moved into this State for any purpose whatsoever, except performing dogs for temporary stay within the State, must be accompanied by a health certificate issued by an approved veterinarian in the State of origin stating that rabies has not existed for the last 9 months within a radius of 50 miles of origin of shipment, and that said animals are free from symptoms of any disease.

When this requirement can not be complied with, dogs will be admitted into the State if accompanied by an official health certificate showing they are free from disease and have been vaccinated with killed rabies vaccine within a period of 6 months.

*Who may inspect.*—Veterinarians approved by the Federal Bureau of Animal Industry to issue health certificates for cattle moving interstate.

Duplicates of all certificates must be forwarded immediately to the livestock sanitary board, Bismarck. Inspections made by veterinarians failing to comply with these requirements will be refused recognition.

All tests and inspections must be made within 30 days of shipping of stock, unless originating from Federal or State officially accredited tuberculosis-free herds.

*Official.*—State veterinarian, Bismarck.

## OHIO

*Horses, mules, and asses.*—None.

*Cattle.*—The Federal regulations shall apply to the movement of all cattle into the State.

Dairy and breeding cattle shall be accompanied by a tuberculin test made not earlier than 60 days preceding the date of shipment, except as provided herein for cattle from an accredited herd or modified accredited area. The intradermic test will be accepted and recognized when such test is applied by Federal, State,

or an accredited veterinarian experienced in making such test, and the test chart shall show at least one observation made not earlier than the seventy-second hour after injection and no reactors obtained on the cattle intended for shipment. Cattle originating from a herd or herds in which reactors were found may be held in quarantine at the owner's expense, at the discretion of the State department of agriculture, pending a retest.

Cattle from an accredited herd shall be accompanied by a certificate issued by a State veterinary inspector or Federal veterinary inspector showing the cattle to be from such a herd. The official certificate of tuberculin test shall show a description of the cattle, the method of test used, and the number of the accredited herd certificate.

Cattle from a modified accredited tuberculosis-free area which shall originate immediately at the time of shipment from a herd in such area which on the last official tuberculin test passed without any reactors being found shall be accompanied by an official certificate of tuberculin test, and such certificate shall show a description of the cattle, the method of test, and an indorsement that the cattle have originated from such an area, and such other information as shall be required on the certificate.

A copy of the certificate of tuberculin test shall in all cases be forwarded to the department at the time of or immediately preceding the shipment.

Steers and strictly range cattle for feeding or grazing purposes may be shipped, transported, or otherwise moved into Ohio and the bureau inspector at a public stockyard is authorized to release for shipment such cattle for Ohio, provided, however, that a report is immediately made to the department. Shipments of cattle of this class not originating in public stockyards may be moved into Ohio provided they are accompanied by a certificate of health issued by an approved veterinarian showing that they are free from infectious and contagious disease. The report or certificate from the bureau and approved veterinarian shall give the number of cattle and the breed; also, whether heifers or cows, and the name and address of the consignee.

Cattle for immediate slaughter may be shipped, transported, or otherwise moved into Ohio to a place where Federal, State, or city meat inspection is maintained, or to a place which has been designated by the department. The bureau inspector at a public stockyard is authorized to release such shipments for Ohio.

Bull calves of the beef breeds under six months of age may be moved into Ohio for feeding and grazing purposes, provided the owner makes a written declaration that the animals will be castrated within 10 days after destination is reached. One copy of the certificate or declaration shall accompany the shipment, one copy shall be mailed to the department.

Semirange, female cattle of the beef breeds may be moved into Ohio from public stockyards for feeding and grazing purposes if the owner or his agent obtains permission from the inspector in charge of said yards, or from other points, provided the owner obtains a certificate from the bureau veterinarian or the veterinarian approved by the bureau and the State of origin which shall certify that he has inspected the cattle and that they are of the semirange type and free from symptoms of infectious and contagious disease. A copy of the certificate giving the number of cattle, breed, also whether heifers or cows, and the name and address of the consignee shall be sent immediately preceding or at the time of shipment to the department.

*Swine.*—All swine moved into Ohio for breeding purposes must be accompanied by a certificate that they have been immunized by the Dorset-McBride-Niles serum-alone method not more than 15 days prior to date of shipment and not less than 30 days prior to date of shipment when the simultaneous method is used. Swine for feeding purposes may be shipped into Ohio in accordance with the regulations issued by the United States Department of Agriculture.

*Sheep.*—All sheep shipped from public stockyards for purposes other than immediate slaughter shall be dipped under the supervision of an inspector of the Federal Bureau of Animal Industry, except shipments for which permits have been obtained. Sheep originating from points outside of public stockyards must be examined and released by an approved veterinarian, copy of certificate of health must accompany shipment and one copy mailed to State veterinarian. Such shipments are subject to quarantine and inspection after arrival in Ohio.

*Who may inspect.*—Inspectors of the Federal Bureau of Animal Industry. Veterinarians in the employ of the State, and veterinarians who are vouched for by the authorities in charge of the control of animal diseases in the State from which the animals are shipped.

*Official.*—State veterinarian, Columbus.

## OKLAHOMA

*Horses, mules, and asses.*—None.

*Cattle.*—Cattle for dairy or breeding purposes must be accompanied by an intradermic test chart by bureau, State, or accredited veterinarian based on a test made within 60 days prior to shipment, to be held under quarantine and retested at point of destination not less than 30 days nor more than 60 days from date of previous test at the expense of the owner by an accredited veterinarian.

Exception 1.—Stock from accredited herds admitted without test on certification of official State or Federal veterinarian of State of origin.

Exception 2.—Cattle from "accredited herds" and of herds under Federal supervision for accreditation "steers and range cattle," "slaughter cattle," "shipments (cattle) to public stockyards," "feeding and grazing cattle," "semirange cattle," "emigrant shipments," and "shipments from modified accredited areas," may be moved to Oklahoma as provided for in Federal regulations, *Provided, however*, That female cattle and bulls of strictly range herds and female cattle of semirange herds may be moved to Oklahoma for feeding and grazing purposes only, and shall not be disposed of or used for breeding purposes.

Bureau regulations will apply in the interstate movement of cattle affected with or exposed to scabies or ticks.

*Hogs.*—Swine other than for shipment to recognized market centers must be simultaneously immunized 21 days prior to shipment by a graduate veterinarian, certificate must be attached to waybill and copy sent to the State veterinarian; or, swine may be shipped into this State without immunization under the following conditions: A permit for each shipment must first be obtained from the State veterinarian, giving the owner's name and destination; the swine shall be treated by a graduate veterinarian with simultaneous inoculation method within 72 hours after arrival at destination. The swine shall be held in strict quarantine at destination for a period of 21 days.

*Sheep.*—No sheep shall be shipped, trailed, driven, or otherwise moved interstate from areas or premises quarantined for the disease of scabies except as provided for in the Federal regulations.

*Who may inspect.*—State, bureau, and accredited veterinarians.

*Official.*—State veterinarian, Oklahoma City.

## OREGON

*Horses, mules, and asses.*—Health certificate, including mallein test, complement-fixation test, or other officially accepted test. Imported stallions and mares coming direct from European ports need not be mallein tested. Horses for racing and exhibition purposes are exempted from the mallein test.

*Cattle.*—Health certificate, except for animals for immediate slaughter consigned to a public stockyard having Federal inspection, including intradermic or subcutaneous tuberculin test for all dairy and breeding cattle. Cattle from Federal-State accredited herds must be covered by certificate together with number and expiration date of accredited-herd certificate. Cattle from a modified accredited tuberculosis-free area by the Federal Bureau of Animal Industry co-operating with the State, and cattle that immediately originate from a herd in such area which at the last official test was negative and which previous tests had been less than 1 per cent reactors may be admitted under special permit without test. Animals must be covered by certificate signed by approved veterinarian covering these heretofore outlined requirements. Cattle for exhibition purposes may move into the State under Federal regulations when accompanied by an official health certificate and test chart showing such cattle to be from either accredited herds or free herds in accredited tuberculosis-free areas or must have been tested not more than 120 days prior to admission. All cattle for purposes other than dairy and breeding, moved into Oregon under Federal regulations, shall be covered by an official health certificate, except steers and strictly range cattle which may be moved into Oregon under a special permit. Cattle for immediate slaughter not going to stockyards having Federal inspection may be moved in under permits and arrangements made for slaughter after arrival under proper supervision. Female cattle for feeding and grazing purposes and bulls for feeding purposes shall be quarantined at destination and branded with "F" on right jaw and held apart from other cattle under quarantine until shipped to market or tuberculin tested and released. All cattle except settlers' and homesteaders' effects brought into Oregon from the territory east of the Mississippi River and north of the Tennessee-North Carolina north boundary line must first receive a written permit from the State veterinarian to be moved into the State before such movement may be made.

*Hogs.*—Health certificate, except for animals for immediate slaughter going to stockyards having Federal inspection. Swine moved into Oregon consigned to other than stockyards having Federal inspection must either have been immunized with anti-hog-cholera serum or shall be permitted entrance under exemption permit granted by the Oregon State Livestock Sanitary Board. Swine immunized by the serum-alone treatment shall be treated not more than 21 days prior to date of importation. Swine immunized by the serum-simultaneous treatment shall be treated not less than 21 days immediately preceding their importation, unless permit is given or swine have been immunized under supervision of the Federal Bureau of Animal Industry at stockyards and arrangements are made for proper quarantine after arrival at destination. Swine for breeding purposes may be admitted into the State to be immunized with anti-hog-cholera serum at point of destination and must have been loaded direct to a cleaned and disinfected car through cleaned and disinfected chutes or other conveyances. Swine of purebred breeding shipped into the State in crates for breeding purposes may be admitted without immunization and without inspection, provided the owner will execute a sworn statement showing the swine not to have been exposed to hog cholera or other infectious diseases covering a period of the past six months. The statement must be made in duplicate, one copy to be attached to the bill of lading and one copy to be sent to the State veterinarian of Oregon. Unless otherwise ordered all swine exhibited at the Pacific International Livestock Show and the Oregon State Fair shall have been given the anti-hog-cholera immunization treatment in accordance with the above-stated requirements.

*Sheep.*—Range bucks from any other State must be dipped twice after arrival unless covered by affidavit from the owner showing that there has been no scab in the district from which the bucks originate for the last six months and telegraphic or other information must come from the Federal inspector in charge confirming this statement.

Range sheep moved from any State where scab exists into Oregon for purposes other than immediate slaughter consigned to a yard having Federal inspection must be certified by a Federal veterinarian in charge of sheep-scabies-eradication work in the State of origin as originating in a territory free from sheep-scabies

infection for the past 12 months. In addition, such sheep must be inspected by an official veterinarian, State or Federal, or a State-Federal approved practicing veterinarian.

Sheep coming from a scab-infected district must be certified by wire or letter showing such sheep to have been officially dipped once if exposed or twice if infected. All dipping must have been done in lime-and-sulphur dip under Federal supervision.

All bucks originating in any State where sheep scab has been present during the past 12 months must, before entrance into the State, in addition to the requirements specified above, be dipped once unless exempted by Oregon order.

All certificates for importation or interstate movement of sheep must be approved by the Federal Bureau of Animal Industry or authorized livestock sanitary official of the State of origin. Exhibition sheep consigned to the Oregon State Fair or the Pacific International Livestock Exposition are exempted from this order.

*Goats.*—Clinical health certificate or affidavit from owner stating that no infectious disease of goats has existed in locality of origin for the last six years.

*Dogs.*—All dogs originating in any State or Territory where rabies is known to exist must be accompanied by an affidavit from the owner that no rabies has been present within 25 miles of point of origin for the last three months, in lieu of which clinical health certificate from veterinarian certifying to these requirements or certification that antirabic treatment has been given within one year from date of shipment.

*Chickens.*—All hatching eggs, baby chicks, growing and breeding stock moved into the State must be accompanied by an official health certificate certifying that the same have come from parent stock which has been within one year found free from bacillary white diarrhea by application of the agglutination test or such test as may be approved by the Federal Government.

Breeding stock that have not reached the laying stage must be held until they molt or must be sent in under permit to test after arrival.

This order exempts turkeys, ducks, and all other fowls except chickens.

Eggs for immediate consumption or storage and poultry stock for immediate slaughter or exhibition purposes are also exempted, but statement must be made on the container for what purpose.

*Who may inspect.*—Official veterinarian, State or Federal; graduate veterinarian when approved in writing by State veterinarian or like officer, except as to cattle, which must be inspected and tested according to Federal regulations, and sheep, which must be inspected by official veterinarians only, State or Federal.

*Official.*—State veterinarian and secretary of State livestock sanitary board, Salem.

## PENNSYLVANIA

*Horses, mules, and asses.*—Must be free from transmissible diseases, by physical examination.

*Cattle.*—Apparently healthy cattle of any class may be transported without restriction, if consigned to public stockyards at Pittsburgh, Lancaster, or West Philadelphia. Cattle for immediate slaughter must be consigned to an approved slaughterhouse or slaughtering center. Southern cattle from below Texas-fever quarantine line must have special permit. Steers, stockers, feeders, and grazers may be admitted, subject to Federal regulations, in quarantine at destination. All other classes must be accompanied by health certificate and approved tuberculin-test chart.

*Hogs.*—Swine that are diseased or that have been actively exposed to hog cholera or other dangerous, transmissible swine disease shall not be brought into Pennsylvania for any purpose whatever. Swine for purposes other than immediate slaughter must be immunized, single or double method, ear tagged and certificate accompany animals, also copy of certificate sent to official (below). Single treatment within 30 days of entry; double treatment no limit of time but double-treated hogs must not be sold without notice to buyers. Apparently healthy swine that have not been actively exposed to cholera or other dangerous transmissible swine disease may be brought in for *immediate slaughter* when consigned directly to an approved slaughterer or slaughtering center. Healthy, unexposed swine may be brought in temporarily for breeding or exhibiting without permit or certificate if transported in clean and disinfected crates or vehicles or by express.

*Sheep.*—Sheep and goats for immediate slaughter must be consigned to an approved slaughterhouse or slaughtering center and the waybill marked "For immediate slaughter"; for breeding or exhibition purposes must be accompanied by statement from owner that they are free from and have not been actively

exposed to disease. Other classes admitted on permit must not be handled through stockyards or stock pens where trading in livestock is conducted or in cars that have not been cleaned and disinfected.

*Domestic animals and poultry* that are affected with or that have been actively exposed to any dangerous transmissible disease must not be brought into the State for any purpose except by special arrangement with Federal and State regulatory authorities.

*Who may inspect.*—Only veterinarians who are accredited by State and Federal regulatory authorities.

*Official.*—Bureau of animal industry, Harrisburg.

## PORTO RICO

All animals imported into Porto Rico from the United States are inspected by a veterinary inspector of the department of health.

*Horses, mules, and asses.*—Must be subjected to a physical examination before landing. Mallein test required; charts must be signed by a veterinarian from the Federal Bureau of Animal Industry.

*Cattle.*—Physical examination as above; also tuberculin test required; charts, signed as above.

*Hogs.*—Physical examination as above; also certificate of being immune to hog cholera. Certificate signed as above.

*Who may inspect.*—Only veterinary inspectors of the department of health of Porto Rico (except as below).

Animals imported from foreign countries are inspected by a veterinarian of the Bureau of Animal Industry of the United States Department of Agriculture.

*Official.*—Commissioner of health of Porto Rico, San Juan.

## RHODE ISLAND

*Horses, mules, and asses.*—Ophthalmic mallein test either before or after arrival. A permit must be obtained from the chief veterinarian of the State department of agriculture, and must accompany the shipment.

*Cattle.*—Cattle may be brought into Rhode Island only after a permit has been issued for such movement of cattle by the chief veterinarian of the State department of agriculture, such permits being issued only when charts are presented showing that the animals to be imported have been subjected to the intradermic test and have shown a negative reaction within three

months from date of importation. All other requirements in accordance with the Federal regulations.

*Hogs.*—Health certificate unless for immediate slaughter.

*Sheep.*—Health certificate.

*Who may inspect.*—Chief veterinarian of the State department of agriculture, or cattle commissioner appointed by said chief veterinarian.

*Official.*—Chief veterinarian, Providence.

## SOUTH CAROLINA

*Horses, mules, and asses.*—Health certificate, mallein test of any exposed animals.

*Cattle.*—Health certificate and tuberculin-test chart of all cattle for breeding or dairying purposes within 30 days of shipment, unless they are from accredited herd or herds in process of accreditation.

Infectious-abortion test of all cattle more than 6 months of age if for breeding or dairying purposes, within 15 days of shipment.

Cattle for slaughter, if consigned to points designated by State veterinarian as immediate-slaughter points, will be accepted on shipper's affidavit stating that cattle are to be used for immediate-slaughter purposes only.

*Swine.*—Health certificate showing treatment against cholera within 18 days if by serum-alone method, or not less than 18 days if by serum-and-virus method, before shipment.

Infectious-abortion test of all swine more than 6 months of age if for breeding purposes, within 15 days of shipment.

Swine for slaughter, if consigned to points designated by State veterinarian as immediate-slaughter points, will be accepted on shipper's affidavit stating that swine are to be used for immediate-slaughter purposes only.

*Sheep.*—Health certificate unless consigned to designated immediate-slaughter points.

*Who may inspect.*—Official veterinarians, State or Federal.

*Official.*—State veterinarian, Columbia.

## SOUTH DAKOTA

*Horses, mules, and asses.*—Horses, mules, and asses must be accompanied by a health certificate indorsed by the proper livestock sanitary officials of the State

of origin. A copy of such certificate shall be immediately forwarded to the South Dakota division of animal industry, Pierre, S. Dak.

Stallions and jacks must be accompanied by a special certificate of soundness from an approved veterinarian on form furnished by this department, certifying that each animal is free from cataract, amaurosis, laryngeal hemiplegia (roaring or whistling), stringhalt, glanders, sidebone, farcy, clinical symptoms of *maladie du coït*, urethral gleet, mange, bone spavin, ringbone, and curb when accompanied by curby hock. A copy of this certificate must be mailed to the director of the division of animal industry at least five days before the importation of each such animal into the State.

**Cattle.**—Bulls and female cattle brought into the State must be accompanied by an official health certificate, including a chart showing that they have passed a satisfactory tuberculin test. If satisfactory evidence is furnished that bulls, cows, or heifers are strictly range cattle originating in any one of the States of Arizona, New Mexico, Texas, Utah, Colorado, Idaho, Montana, Wyoming, or Nevada, or in Kansas or Nebraska west of the 100th meridian, or other territory practically free from tuberculosis, and will not be used for dairy or domestic purposes, a permit may be issued on request of the owner by the South Dakota division of animal industry admitting such cattle without tuberculin test.

Cattle from Federal-State accredited tuberculosis-free herds or from areas officially declared by the Chief of the Federal Bureau of Animal Industry as modified accredited areas must be accompanied by an official certificate signed by Federal or State authorities of the State of origin showing them to be from such herds or from unquarantined herds in modified accredited areas.

All tuberculin tests must be made within 30 days prior to date of shipment.

All certificates must show the number of cattle, name of owner, and post-office address. All cattle not identified by registration name and number shall be identified by a proper metal tag, bearing a serial number, attached to the ear.

**Hogs.**—All swine imported into South Dakota, except for immediate slaughter, must be transported in crates or cleaned and disinfected cars and must be accompanied by a certificate that the swine have been immunized against hog cholera with serum and virus

not less than 21 days prior to date of shipment, or with the serum-alone treatment not more than 21 days before date of arrival of shipment at destination. Such certificates must state the date of immunization and the name of the company manufacturing the serum used. Swine from public stockyards must be immunized in accordance with Federal regulations and shipped into quarantine for a period of 21 days.

*Sheep.*—The owner of any sheep to be imported into South Dakota by any means or method must first obtain a permit to do so from the director of the division of animal industry. All such sheep must then be inspected by an inspector of the Federal Bureau of Animal Industry or an approved veterinarian where such sheep originate and be accompanied by a certificate issued by the inspecting officer showing them to be free from infectious and contagious diseases, giving points of origin and destination and stating for what purpose the sheep are to be used. On arrival in South Dakota such sheep shall be placed in quarantine and be immediately dipped at the expense of the owner under supervision of a representative of the division of animal industry of the State department of agriculture or of the Federal Bureau of Animal Industry in a manner approved by that bureau for the eradication of scabies.

Sheep for feeding purposes only may be brought into the State on a permit and quarantined without dipping.

Sheep for exhibition only and immediate removal thereafter may be brought into South Dakota with health certificate. No restrictions are placed on sheep imported for immediate slaughter.

All expenses for the inspecting, testing, quarantining, and dipping of livestock brought into the State shall be paid by the owner of such livestock.

No agent or employee of a railroad or other transportation company shall deliver or release from the charge or custody of such company within the State, except for immediate slaughter under official supervision, any livestock brought into this State unless he has in his possession a satisfactory health certificate covering the livestock in such shipment.

*Who may inspect.*—Veterinarians authorized by the State of origin and approved by the Federal Bureau of Animal Industry to apply the tuberculin test or by a regular bureau inspector.

*Official.*—Director, division of animal industry, Pierre.

## TENNESSEE

*Horses, mules, and asses.*—Health certificate. Horses, mules, and asses originating in area quarantined on account of southern, splenetic, or Texas fever outside of Tennessee shall not at any time be transported, driven, or allowed to drift therefrom into any portion of the State unless they are dipped under official State or Federal supervision in a standard arsenical solution either at point of origin or in transit.

*Cattle.*—Health certificate. When intended for dairy or breeding purposes the inspection must include the tuberculin test. The tuberculin test shall include the reading and recording of at least three pretemperatures at intervals of not less than 2 hours and six posttemperatures, the latter to begin 8 hours after the injection of the tuberculin and continued at intervals of 2 hours. If at the eighteenth hour there is no evidence of an appreciable rise in temperature the readings may be discontinued. The intradermic test is recognized when made by a bureau, State, or accredited veterinarian. The ophthalmic test alone is not acceptable. All cattle entering the State intended for breeding or dairy purposes will be subjected to an official tuberculin retest at the end of 90 days immediately following their arrival within the State. This retest is to be made at the expense of the owner.

Cattle originating in any area quarantined on account of southern, splenetic, or Texas fever, outside of Tennessee, shall not at any time be transported, driven, or allowed to drift therefrom to any portion of the State except when handled in accordance with the regulations of the Bureau of Animal Industry, United States Department of Agriculture, and accompanied by a certificate of an authorized inspector of that department.

*Swine.*—Purebred swine shipped in crates by express must be accompanied by either a certificate of health, signed by an authorized veterinarian or an affidavit from the owner, indicating that said swine, to the best of his knowledge and belief, have not been exposed to hog-cholera infection or any other contagious swine disease for at least 30 days immediately preceding date of shipment. The affidavit must be made in triplicate, one copy to be delivered to the transportation company, one to the livestock sanitary official in the State where the shipment originates, and another to the State veterinarian of Tennessee.

Swine shipped as "stock hogs" must be accompanied by a certificate of health, must be loaded in cleaned and disinfected cars, must not have been obtained from public stockyards unless handled as hereinafter indicated, and must not be unloaded in public stockyards en route.

Swine from public stockyards are accepted only for immediate slaughter unless handled as hereinafter indicated, and must be billed to a recognized slaughtering center.

Swine from public stockyards are accepted for purposes other than immediate slaughter provided they are obtained from stockyards under immediate Federal supervision and having special facilities for handling such swine in accordance with Federal regulations. Swine so obtained, handled, and transported into Tennessee must not be unloaded in public stockyards en route and must be held in absolute quarantine at destination for a period of 21 days, and if at the end of that period there is no evidence of disease they may be considered released.

*Sheep.*—Health certificate for purebred sheep. Sheep intended for purposes other than immediate slaughter must be accompanied by a certificate of health indicating that they are free from disease and have been subjected to an official dipping for scabies, in a solution approved by the Federal Bureau of Animal Industry, within 10 days immediately preceding date of shipment, and must be loaded in cleaned and disinfected cars. The dipping requirements do not apply to purebred sheep.

*Who may inspect.*—State and Federal inspectors or other qualified veterinarians who are approved by the livestock sanitary control official of the State in which the shipment originates.

*Official.*—State veterinarian, State capitol, Nashville.

## TEXAS

*Horses, mules, and asses.*—Official health certificate. No mallein test required.

*Cattle.*—Cattle for dairy or breeding purposes must be accompanied by health certificates showing tuberculin test within 60 days of date of entry, except that cattle from accredited herds may enter the State without tuberculin test, when certified to by a State or Federal veterinarian as being accredited. Cattle, other than from an accredited herd, will be quarantined for

a retest within 90 days from the date of last test. The intradermic test is accepted with a 72-hour reading.

Cattle from Federal or State fever-tick-quarantined areas must be certified to as being free from fever ticks by an inspector of the Federal Bureau of Animal Industry, copy of certificate attached to waybill accompanying shipment, and copy mailed to the Texas Livestock Sanitary Commission.

Cattle from areas quarantined on account of cattle scabies must be accompanied by a certificate issued by an authorized inspector of the Federal Bureau of Animal Industry or the livestock sanitary board of the State of origin, showing that the cattle have been inspected and dipped for scab infection.

*Hogs.*—Hogs for purposes other than immediate slaughter must be accompanied by a health certificate showing that immunization with serum-alone within 30 days of date of entry, or by simultaneous method at least 30 days before date of entry, and all such hogs must have been dipped in a 2 per cent cresol compound solution. Such hogs must be shipped in clean and disinfected cars and not handled through public stockyards or chutes at point of origin, en route, or at destination.

Hogs for immediate slaughter must be consigned to recognized federally inspected slaughtering establishments. Cars or boats containing hogs from areas known to be infected with hog cholera must be placarded "CHOLERA-EXPOSED HOGS."

*Goats.*—Must be accompanied by a health certificate from an authorized veterinarian.

*Sheep.*—(a) The importer must apply to and receive from the livestock sanitary commission of this State, permission to import any sheep (except sheep billed to market centers for slaughter purposes) into the State.

(b) Such importations shall be accompanied by a certificate of a regularly employed and duly authorized sheep-scabies inspector of the State of origin, or a duly appointed and acting sheep-scabies inspector of the United States Bureau of Animal Industry, certifying that said sheep are free from scabies infection and exposure thereto, and that said sheep have been dipped in a dipping fluid recognized by the United States Bureau of Animal Industry for the eradication of sheep scabies and in a manner calculated to have eradicated infection or exposure, as the case may be, within 10 days next preceding the date of such importation, provided, however, that sheep dipped for infection at point of origin shall be held under quarantine at point of

destination for a period of 180 days. By "point of destination" as used herein is meant the range upon which the said sheep are placed in this State, provided further that in the event the sheep are accompanied by the proper certification and permit they may be moved into the State without first having been dipped, when arrangements are made with the livestock sanitary commission at Fort Worth, Tex., prior to movement, to dip on arrival in the State.

(c) All importations of sheep by rail shall be billed to a recognized sheep-dipping center where the livestock sanitary commission of this State maintains an inspector to supervise the dipping of sheep except sheep imported for show purposes only or for immediate slaughter, and on arrival there shall be dipped unless the same are accompanied by a certificate of dipping at point of origin as provided in paragraph (b) of these requirements.

(d) The importer of show sheep shall be given a reasonable length of time to display his sheep at county fairs or livestock exhibits, but in no instance shall this time be extended for a longer period than 60 days from date of importation and all such sheep shall be kept separate from all other than show sheep, and shall be dipped at least once before being distributed to the range.

No common carrier by rail in this State shall receive from any shipper or connecting carrier into this State any shipment of sheep (except sheep billed for slaughter purposes) unless the bill of lading covering said shipment is accompanied by a written permit from the livestock sanitary commission of this State, or its chairman, permitting such sheep to be imported into this State.

*Dogs.*—Official health certificates showing freedom from disease and to have been immunized against rabies with a recognized rabies vaccine not longer than 10 months prior to shipment.

*Poultry.*—Poultry may be admitted into the State subject only to such regulations as may be enforced by the Federal Bureau of Animal Industry.

*Who may inspect.*—Federal or State veterinarians or accredited or approved veterinarians, approved by the Federal Bureau of Animal Industry, and officials of the State of origin, or authorized sheep-scab inspectors of the State of origin, or inspectors of the Federal Bureau of Animal Industry.

*Officials.*—Chairman, Livestock Sanitary Commission of Texas, and State veterinarian, Fort Worth.

## UTAH

*Horses, mules, and asses.*—Health certificate, including mallein-test chart made within 30 days prior to arrival of animals at destination. Ophthalmic mallein-test recognized.

Animals for temporary racing or exhibition purposes admitted on clinical health certificate accompanied by affidavit from owner stating that they are for temporary, racing, or exhibition purposes only.

*Cattle.*—All cattle for dairying and breeding purposes, health certificate, including (official) subcutaneous or intradermic tuberculin-test chart.

Cattle accepted from officially accredited tuberculosis-free herds when accompanied by proper certificate signed by State and Federal authorities.

Branded range bulls, health certificate, including intradermic test chart, provided the last reading is not made earlier than the 72d hour, and all cattle brought into this State for dairy or breeding purposes shall be kept and held entirely separate from any and all other cattle for a period of 90 days from date of arrival at destination unless sooner released by the State veterinarian, provided that mature cows may be kept on owner's inclosed premises for a like period of time. The State board of agriculture shall be notified by the owner or consignee of the date of arrival of such imported cattle and the place where held. The State veterinarian shall cause such cattle to be tuberculin tested within the period named above, employing not less than two recognized tests, the owner of said cattle to pay the cost of such testing, and no indemnity shall be paid by the State, provided that these provisions shall not apply to what is known as range cattle or branded cattle raised in pasture or open range or to cattle imported for exhibition purposes or resale on commission, and provided further that such exception shall not apply for a longer time than the exhibition period or in case of resale on commission for a longer period than 10 days, and provided further that the State board of agriculture shall be notified of the arrival by the importer.

For branded range cattle, health certificate showing them to be free from any contagious or infectious disease.

*Hogs.*—For purposes other than immediate slaughter must be accompanied by a certificate certifying that (1) the swine are free from any contagious or communicable disease, (2) have been immunized

against hog cholera 30 days before shipment, (3) and have been dipped in a 3 per cent solution of cresol compound, U. S. P. Immunization shall be active (serum-simultaneous) with hog-cholera virus and serum that meets the potency, purity, and permanency requirements of the Federal Government; serum and virus must be administered by a veterinarian. The certificate shall be indorsed by the State veterinarian of State or Territory of origin.

All public stockyards and all railroad livestock and express cars and express barns or pens shall be considered infected territory.

*Sheep and goats.*—Other than immediate slaughter, health certificate certifying them free from disease; duplicate must be sent to the chief sheep inspector.

If the sheep or goats come from a known infected district, they must be accompanied by a certificate of dipping under the supervision of a State or Federal inspector. If not accompanied by a certificate of dipping, they must be dipped twice with an interval of 10 to 14 days between dippings, by either State or Federal inspector.

*Who may inspect.*—Federal, State, or deputy State veterinarian of the State in which the shipment originated.

*Official.*—Inspector, State department of agriculture, Salt Lake City.

## VERMONT

*Horses, mules, and asses.*—Before shipping, permit must be obtained from the commissioner of agriculture. Physical examination or mallein test required. Permits will state whether mallein test or physical examination only is required. Animals must remain in quarantine on owner's or consignee's premises until released by commissioner of agriculture. Such release will be sent when satisfactory health certificates are received. Physical examination or mallein test must be made within 15 days of the date of entry. If made in State of origin, certificate must be approved by official in charge of livestock sanitary matters in State of origin. Test or examination after arrival must be made by veterinarian, approved by commissioner of agriculture, at owner's expense.

*Cattle.*—Before shipping, permit must be obtained from the commissioner of agriculture. Requests for permits must state number of cattle, ages of all calves under 6 months, and whether cattle are for dairy, exhibition, or breeding purposes or for immediate reship-

ment, or immediate slaughter. All cattle from other than officially accredited herds, or herds under State and Federal supervision which have passed one clean test, except those for exhibition, immediate reshipment, or immediate slaughter, shall be held in quarantine for an official tuberculin test to be made by an approved veterinarian under the direction of the commissioner of agriculture, at the owner's expense, not less than 60 days after entry. Animals passing the test will be released from quarantine upon receipt of satisfactory test report. Reactors may be killed on importer's premises under supervision of a veterinarian, may be shipped to an abattoir for slaughter under Federal inspection, or may be returned to State of origin if shipped in accordance with Federal regulations.

Cattle from officially credited herds, or herds under State and Federal supervision which have passed one clean test, will not be detained in quarantine if the commissioner of agriculture is furnished with a certificate by the proper official showing that cattle are from such herds.

*Sheep.*—Health certificate showing freedom from symptoms of communicable diseases.

*Swine.*—Health certificate showing freedom from symptoms of communicable diseases.

*Who may inspect.*—Federal inspectors, veterinarians whose inspections are indorsed by proper sanitary officials of State of origin, and the livestock commissioner or his assistant.

*Official.*—Livestock commissioner, State House, Montpelier.

## VIRGINIA

*Horses, mules, and asses.*—None.

*Cattle.*—All cattle coming into the State for dairy or breeding purposes, male or female, must be accompanied by a written certificate showing that they have passed the tuberculin test not longer than four months before entering the State. Said tests must have been conducted by a qualified veterinarian who is authorized by the State and United States Bureau of Animal Industry to do accredited herd testing, or a qualified veterinarian regularly employed by the State or Federal Bureau of Animal Industry except cattle from a herd accredited by the bureau in cooperation with the various States as free from tuberculosis, which cattle must be accompanied by a certificate issued by an authorized

State or Federal inspector showing the cattle to be from such a herd, said certificate to contain the date of the last herd test. All certificates must be presented to and approved by the State veterinarian before said cattle shall be allowed to enter the State. When cattle are imported into Virginia and react to the first tuberculin test applied after their arrival into the State the owner will not be reimbursed for such reactors.

No cattle originating in any area under State or Federal quarantine on account of southern, splenetic, or Texas fever shall enter the State.

Female cattle billed FOR IMMEDIATE SLAUGHTER must be consigned to an establishment which maintains State or Federal inspection, or to public stockyards where State or Federal inspection is regularly maintained.

*Hogs.*—All hogs brought into the State for breeding purposes, male or female, old or young, must be accompanied by a written certificate of health signed by a duly qualified veterinarian and indorsed by the State veterinarian of the State from which the hogs originate for shipment. The certificate of health must state that the hog or hogs being shipped or brought into Virginia have, upon examination, been found to be free from all contagious and infectious diseases, and have not been exposed to hog cholera for a period of six weeks prior to shipment. A true copy of the certificate of health must be forwarded, at the time of shipment, to the State veterinarian of Virginia.

*Sheep.*—None.

*Who may inspect.*—Inspectors of the Federal Bureau of Animal Industry, State veterinarians, and accredited veterinarians whose certificates are approved in writing by the State veterinarian or livestock sanitary official of the State in which the animals originate.

*Official.*—State veterinarian, Richmond.

## WASHINGTON

*Horses, mules, and asses.*—Horses, mules, and asses shall have been subjected to the mallein test not more than 20 days prior to shipment, and must be accompanied by an official health certificate, including the record of such test, and certifying that the animals listed thereon are free from glanders and other infectious and communicable diseases.

Horses, mules, and asses for temporary racing or exhibition purposes may be shipped or otherwise transported into this State on a clinical health certificate for a

period not to exceed 90 days. An affidavit from the owner or agent must accompany the health certificate, showing that the animals covered by the health certificate are for racing or exhibition purposes only.

*Cattle.*—All breeding and dairy cattle, including range cows of a dairy type, over the age of 3 months, and all bulls shipped, transported, or otherwise moved into the State of Washington must be accompanied by an official health certificate and tuberculin-test record showing that each and every animal is free from tuberculosis and other infectious and communicable diseases. The tuberculin test shall have been made within 60 days prior to date of shipment: *Provided, however,* That such cattle may be shipped direct to an official public stockyard where Federal inspection is maintained without such certificate, but shall not be moved therefrom until they have been tested and examined as hereinabove provided for and a certificate issued accordingly.

An official public stockyard is hereby defined as one where inspection is maintained at all times by the Federal Bureau of Animal Industry. The Union Stock Yards at Spokane is the only official public stockyard in the State in accordance with these regulations.

Cattle from a herd officially accredited by the State of origin and the Federal Bureau of Animal Industry cooperating may be shipped on a clinical health certificate issued by a State or Federal veterinarian. Such certificate shall show the number of the accredited-herd certificate, date of expiration, and description of cattle in accordance with the Federal regulations governing the interstate movement of livestock.

Cattle from herds from modified accredited areas, as recognized by Federal authorities and State of origin, may be shipped on clinical health certificates issued by a State or Federal veterinarian. Such certificate shall show the number of the modified accredited-area certificate, date of expiration, and description of cattle, in accordance with the rules and regulations of the United States Bureau of Animal Industry relating to modified accredited areas.

Steers, spayed females, and strictly range females not showing any crosses with the dairy type may be shipped into this State on a clinical health certificate certifying that they are clinically free from infectious and communicable diseases, if branded with the letter "F" on the right jaw with a brand two and one-half (2½) inches wide by three (3) inches high: *Provided,* That steers, spayed females, and strictly range females

may be shipped to an official public stockyard without a certificate of inspection, but before being moved therefrom must be examined and branded as described above by the supervising Bureau of Animal Industry inspector, and the forms as issued by the Federal Bureau of Animal Industry must be submitted to the State official in charge of the dairy and livestock division.

Cattle may be imported into the State for immediate slaughter (to be slaughtered not later than 14 days after arrival at destination) without test or examination: *Provided*, That (a) the waybills are marked "Cattle for immediate slaughter" and this fact certified to by the owner; (b) that said cattle will not be diverted en route; (c) that said cattle are billed to a recognized slaughtering center as listed in this order.

The intradermic method of testing will be accepted for shipments of cattle into the State: *Provided*, That the first observation shall not be made before the seventy-second hour or later than the seventy-sixth hour from the time of injection, and a second observation be made at the ninety-sixth hour, and if any reactors or suspects are found among the cattle being tested, a third observation must be made at the one hundred and twentieth hour before the shipment is made.

*Swine.*—Swine for all purposes other than immediate slaughter must be accompanied by a clinical health certificate stating (a) that they are free from all infectious and communicable diseases, (b) that they have not come from a public stockyard or slaughterhouse yard, (c) that they have either originated in a district in which cholera has not existed during the past six months, or if from an infected district, that they have either been single treated not less than 18 nor more than 30 days prior to date of shipment, and if double treated, it must have been 90 days prior to date of shipment.

Swine for immediate slaughter will be admitted without inspection when billed to a recognized slaughtering center (see list) or public stockyards under Federal supervision: *Provided*, (a) that the waybills are marked "Swine for immediate slaughter," and (b) that they will not be diverted en route.

Swine shall not be shipped or otherwise moved into or within the State of Washington from a public yard or slaughterhouse yard unless they have either been single or double treated and thereafter dipped in a

solution of cresol compound U. S. P. of 2 per cent strength or a solution of another recognized disinfectant.

All swine shipped or otherwise transported into or within the State must be loaded through clean and disinfected yards and chutes and into cars, wagons, trucks, or other conveyances cleaned and disinfected for the shipment.

All swine receiving the double treatment will be held in quarantine at point of destination for a period of three weeks.

Purebred swine for exhibition or breeding purposes may be shipped into the State in cars by express when accompanied by a permit and affidavit issued in triplicate, blanks for which may be obtained from the department of agriculture, division of dairy and livestock, Olympia.

*Sheep.*—All sheep, except those for immediate slaughter, shipped, trailed, or otherwise transported into the State must be accompanied by a certificate of health certifying that they are free from symptoms of infectious and communicable disease and that they have not been exposed to scabies for a period of six months or more preceding date of shipment. Each and every certificate issued must also include a certification from the owner that the sheep covered by the certificate have not been exposed to scabies for a period of six months or more preceding date of shipment.

All sheep shipped into or within the State must be loaded through clean and disinfected corrals and chutes and into cars cleaned and disinfected for the shipment or shipments. The veterinarian issuing the interstate health certificate shall certify thereon that he personally supervises or vouches for the disinfection of the cars as hereinabove provided for.

Purebred sheep for exhibition or breeding purposes may be shipped into the State in cars by express when accompanied by a permit and affidavit issued in triplicate, blanks for which may be obtained from the department of agriculture, division of dairy and livestock, Olympia.

All goats shipped or otherwise moved into the State must be accompanied by an official health certificate certifying that they are free from infectious and communicable diseases.

*Dogs.*—All dogs shipped into the State for any purpose whatsoever, except performing dogs, must be accompanied by an official health certificate showing

them to be free from symptoms of infectious and communicable disease and certifying that they have been vaccinated with rabies vaccine not over six months prior to date of shipment.

*Who may test, examine, and issue health certificates.*—State, Federal, or graduate licensed veterinarians, authorized and approved by the State of origin and the Federal Bureau of Animal Industry, are hereby authorized to inspect and examine livestock and dogs for shipment into the State.

*Recognized slaughtering centers.*—Following is a list of recognized slaughtering centers, subject to change:

Armour & Co., Spokane.

Barton & Co., Seattle.

Carstens Packing Co., Spokane.

Carstens Packing Co., Tacoma.

Columbia Packing Co., Snohomish.

Enterprise Meat Co., Wenatchee.

Frye & Co., Seattle.

Gibson Packing Co., Yakima.

James Henry Packing Co., Seattle.

Inland Meat Co., Wenatchee.

Sumner Meat Co., Sumner.

Walla Walla Meat & Cold Storage Co., Walla Walla.

*Official.*—Director of agriculture, Olympia.

## WEST VIRGINIA

*Horses, mules, and asses.*—Horses, mules, and asses must be certified as free from transmissible diseases as shown by physical examination within 30 days prior to entrance. Stallions and jacks must be subjected to a physical examination after arrival and license issued before being used for public service.

*Cattle.*—All cattle for breeding or dairy purposes, unless from Federal-State accredited herds, must be accompanied by a health certificate including tuberculin-test chart covering test made within 60 days prior to entrance and may be quarantined at destination for retest not less than 60 days nor more than 90 days after arrival, at the discretion of the commissioner of agriculture.

Cattle from Federal-State accredited tuberculosis-free herds must be accompanied by an official certificate signed by Federal or State authorities of the State of origin, showing them to be from such herds and including a copy of last previous tuberculin test of such animals.

Steers for feeding and grazing purposes may enter the State without restriction except when destined to points in modified accredited counties or counties in which area tuberculosis-eradication work is in progress. In such counties steers shall be subject to quarantine at destination and shall not be permitted to mingle with tested cattle unless and until they have been subjected to a tuberculin test by an accredited veterinarian and record of test has been filed with the commissioner of agriculture.

Female cattle or bulls for feeding or grazing purposes entering the State must be accompanied by a certificate of tuberculin test applied within 60 days of entrance, unless accompanied by a declaration of the consignee that said animals will be spayed or castrated within 15 days after arrival at destination, under which circumstances regulations covering importation of steers apply.

Cattle intended for slaughter within 10 days may be consigned to recognized slaughtering centers provided declaration has been made by the shipper that the cattle are intended for such purpose and during the time they are held before slaughter shall not mingle with cattle not intended for slaughter within a like period.

*Hogs.*—Health certificate, stating freedom from hog cholera and other infectious disease, based on a physical examination made by a qualified inspector.

*Sheep.*—Health certificate from a qualified veterinarian prior to shipment showing freedom from scabies or other infectious, contagious, or communicable diseases.

*Who may inspect.*—Inspectors of the Federal Bureau of Animal Industry, State veterinarians, and accredited veterinarians whose certificates are approved by the livestock sanitary official of the State in which the animals originate.

*Official.*—Commissioner of agriculture, Charleston.

## WISCONSIN

No animal of any class, which has been exposed to a highly contagious disease or is from an area considered as exposed or closed on account of such highly contagious disease, shall be admitted.

*Horses, mules, and asses.*—Health certificate, including mallein test within 60 days of shipment, except for race horses, performers, circus outfits traveling in their own railroad cars, and Army horses.

*Cattle.*—Cattle may be shipped into Wisconsin when coming from (a) accredited herds, (b) herds in which no reactors were disclosed to last official test applied, located in modified accredited areas, when certified to by the proper State livestock sanitary officials of the State in which the cattle originate.

Other female cattle and bulls for dairy and breeding purposes may be admitted into this State provided they have been properly tuberculin tested by an accredited veterinarian within 60 days of shipment and certificates issued are indorsed by the proper State officials. All cattle included in paragraph 2 must be held in quarantine, separate and apart from all other cattle, at destination, and retested by an accredited veterinarian not less than 60 days nor more than 90 days from date of entry into the State. All expense incidental to quarantine and retesting must be borne by the owner of the cattle.

Female cattle and bulls of the beef breeds may be brought into the State for temporary feeding purposes provided they have been properly tuberculin tested by an authorized veterinarian within 30 days of entry, and such cattle must be held in quarantine separate and apart from all other cattle until released by the State department of agriculture.

Permits will be issued for the entry of steers into Wisconsin without their having been tuberculin tested after the proper affidavit has been filed with the State department of agriculture. Such affidavit forms shall be furnished on application to the State veterinarian, Madison. Such steers shall be maintained in quarantine, separate and apart from all other cattle, until shipped to a regularly established packing plant for slaughter, or permission obtained from the State department of agriculture for other disposition.

Bona fide slaughtering establishments may ship butcher stock from points without or within the State for immediate slaughter by making an application to the State veterinarian, who may issue a permit to ship such cattle without their having been previously tuberculin tested.

Slaughtering establishments maintaining Federal inspection may ship butcher cattle from points without or within the State for immediate slaughter without a permit.

*Swine.*—Swine shipped into the State from public stockyards for immediate slaughter must be consigned to a recognized slaughtering establishment and may not be diverted en route for any other purpose.

Swine shipped into the State from public stockyards, or otherwise, for feeding purposes must be inspected before shipment by a bureau inspector and may be treated by a competent veterinarian under bureau supervision and the shipment shall be accompanied by a certificate issued by a bureau inspector to the effect that they have been immunized. The swine shall be transported in clean and disinfected cars or other vehicles and must remain in quarantine at the owner's premises at the point of destination for a period of at least three weeks.

Swine for breeding purposes and not coming from public stockyards shall have a certificate of health certifying to one of the following: (a) None shall have been treated with the "double method" within 30 days of shipment. If immunized, state date of treatment. (b) If from district within 5 miles of hog-cholera outbreak, must either be immune or have had a treatment of serum alone not less than 10 days nor more than 30 days before shipment. (c) From noninfected districts, shipments may be made when accompanied by a certificate of health issued by an approved veterinarian. Original certificate must be mailed to the State veterinarian, Madison, and a copy attached to the bill of lading or placed in possession of such person who may transport the animals by any means other than by rail, boat, or express. (d) They must be crated and shipped by express or in clean and disinfected cars or other vehicles.

*Sheep.*—Sheep shipped into the State must have been dipped immediately before shipment in a dip approved by the State livestock sanitary board or the bureau of animal industry and under the supervision of State or Federal employees. Sheep intended for breeding purposes may, if crated and shipped by express, be brought into the State if accompanied by a certificate of health issued by an approved veterinarian, stating that such sheep are not affected with or been exposed to scabies. The original of such certificate must be mailed to the State veterinarian, Madison, and a copy accompany the shipment.

On application to the State veterinarian, Madison, a permit will be issued for the shipment of sheep for feeding purposes, without dipping, from scab-free territory, provided they are shipped in clean and disinfected cars and are unloaded en route only in premises or yards officially declared to be free from scab infection by the Federal Bureau of Animal Industry.

*Dogs.*—Dogs may be brought into Wisconsin if accompanied by a certificate of health issued by an approved veterinarian, a copy of which must be mailed to the State veterinarian, Madison.

*Who may inspect.*—Federal, State, assistant State veterinarian or veterinarians whose integrity and competency are vouched for by the official in charge in the State of origin of shipment.

*Official.*—State veterinarian, Wisconsin department of agriculture, Madison.

## WYOMING

*Horses, mules, and asses.*—Health certificate made within 20 days of entering State, showing freedom from infectious or contagious diseases or exposure thereto.

Certificates covering stallions and jacks shall also show them to be free from hereditary disease or serious defects in conformation.

*Cattle.*—Strictly range cattle may enter the State when accompanied by health certificate showing freedom from infectious and contagious diseases.

All dairy cattle and all bulls, and purebred females of any breed, must be accompanied by health certificate including tuberculin test. When the intradermic test is used, chart shall show that observation was made not earlier than 72 hours and that said test failed to show any evidence of reaction. When the subcutaneous test is used chart shall show that at least three pre-temperatures were taken two or three hours apart before the injection of tuberculin, and that at least six temperatures were taken two hours apart beginning not later than eight hours after injection of tuberculin and that test had run for a period of not less than 18 hours with no resulting reaction.

Cattle from Federal-State accredited herds may enter the State when accompanied by certificate showing the number and date of expiration of such accredited herd certificate and signed by the proper authority.

*Swine.*—Health certificate showing freedom from infectious, contagious, or communicable disease, or exposure thereto, and that no swine disease has existed within 30 miles of the point of origin of shipment within a period of six months; otherwise certificate must show that animals have been immunized by the simultaneous method and dipped or sprayed in a 3 per cent solution of cresol compound U. S. P.

Railroad stockyards are considered to be infected and no swine yarded or loaded through them will be received in the State for any other purpose than for immediate slaughter, and 48 hours will be the limit of time in the State prior to slaughter. Hogs for immediate slaughter will be received in the State when accompanied by letter or telegram permission from the State veterinarian of Wyoming.

Hog-cholera virus may be shipped into the State only after permission, either by letter or telegram, has been obtained from the State veterinarian.

*Dogs.*—Health certificate, to include statement to the effect that rabies has not existed at point of origin for six months prior to shipment.

*Who may inspect.*—State and Federal inspectors, or other qualified veterinarians who are approved by the livestock sanitary control officials of the State in which shipment originates. A copy of health certificate, and a copy of test chart in case of tuberculin test, must be forwarded to the State veterinarian, Cheyenne, immediately on the inspection or completion of such test, and a copy of such test chart must be attached to the waybill.

Where cattle enter the State in other manner than by rail, copy of certificate or test chart must be in the possession of the person in charge of such livestock.

All cattle, horses, and swine arriving in the State not accompanied by certificate or test chart in compliance with the governor's general quarantine proclamation will be held under quarantine at destination and inspected and tested at the owner's expense.

*Official.*—State veterinarian, Cheyenne.

*Sheep.*—Health certificate certifying that sheep are free from scabies or necrobacillosis (lip-and-leg ulceration) or exposure thereto. Send 10 days' notice to secretary State board of sheep commissioners, Cheyenne, inclosing 3 cents for each sheep and 25 cents for each buck. All sheep to be dipped twice at destination within 15 days after arrival in a dip prescribed or recognized by the State board of sheep commissioners for scabies.

All sheep or bucks coming into the State for fattening and feeder purposes must come in under inspection by a State or Federal inspector and be held under quarantine until such time as they are ready to be shipped to market, at which time the quarantine will be raised and shipment allowed. If any of these

sheep are to be held in the State for range purposes they will be held subject to the import laws of the State requiring them to be dipped. On arrival of sheep 3 cents a head on all sheep and 25 cents a head on all bucks must be sent to the secretary of the board.

*Who may inspect.*—Federal or State inspectors.

*Official.*—Secretary-treasurer, State board of sheep commissioners, Cheyenne.
